Name:		**Class:**	
Centre Number:		**Index Number:**	

DUNMAN HIGH SCHOOL
PRELIMINARY EXAMINATION
Year 6

HIGHER 1 GEOGRAPHY **8834/01**

Friday **13 Sept 2024** **3 hours**

Additional materials: 1 Insert

READ THESE INSTRUCTIONS FIRST

If you have been given an Answer Booklet, follow the instructions on the front cover of the Booklet.
Write your Centre number, index number and name on the work you hand in.
Write in dark blue or black pen on both sides of the paper.
You may use an HB pencil for any diagrams or graphs.
Do not use staples, paper clips, glue or correction fluid.

Answer Question 1 in **Section A.**
Answer both questions in **Section B.**
Answer **two** questions in **Section C.**

The number of marks is given in brackets [ ] at the end of each question or part question

---

Section A

Cluster 2 Fieldwork

1 Four students undertook an investigation of the effectiveness of the initiative 'Reuse and Return Project' to encourage the use of reusable containers at a hawker centre in Tampines, Singapore. Customers have a choice of either using single-use containers or reusable containers for food to go. Each single-use container costs $0.30 and each reusable container costs $1 and there is a refund of this charge upon the return of each reusable container. 8 stalls participated in this initiative.

The students saw posters at the food centre which aimed to spread awareness of the initiative. The students surveyed customers and conducted face-to-face interviews with selected respondents at one of the participating stalls. The students also set up a self-recording camera (Resource 1) to record the activity at the stall. The collection of the data was done between 11am and 1pm on a Monday in December.

Resource 1 shows the location of the hawker stall where the students collected the data. Resource 2 shows selected results of the questionnaire survey. Resource 3 shows responses from selected interviewees.

(a) Suggest a suitable research question for the investigation and explain why it is suitable. [4]

(b) Explain some possible issues related to risks and research ethics about the students' data collection shown in Resource 1. [5]

(c) With reference to Resource 2, describe the results for the customers' choice of container for food to go. [5]

(d) The students concluded that the initiative has not been effective.

With reference to all resources, evaluate the validity of their conclusion. [10]

(e) The town council has asked the group to gather information that will help to reduce single-use plastic packaging in supermarkets in a neighbourhood.

Explain how the group would go about gathering the information. [6]

Section B

Cluster 1 Sustainable Future and Climate Change

Answer **both** questions

2 Resources 4A and 4B show models of urban land use in developed and developing countries respectively. Resources 5A and 5B show Northumberland Street in the central business district of Newcastle-upon-Tyne before reimaging in 1979 and after reimaging in 2016. Newcastle-upon-Tyne is a large city in England, a developed country.

(a) Compare the urban land-use models shown in Resources 4A and 4B. [5]

(b) Suggest possible reasons for the locations of the slum housing seen in Resources 4A and 4B. [4]

(c) Suggest reasons why developed countries such as England undertake urban reimaging efforts. [4]

(d) Using Resources 5A and 5B, suggest ways in which the changes shown between 1979 and 2016 have improved sustainable development of Newcastle-upon-Tyne. [5]

(e) Explain the concept of sustainable development, as defined in 'Our Common Future'. [4]

3 Resource 6 shows the changes to the position of the ice front of the Larsen B Ice Shelf, Antarctica, from 1947 to 2002. Resource 7 shows the number of people per country living on land expected to be below sea level by 2100. Resource 8A shows the temperature difference of mean sea surface temperature compared to the 20th century average between 60°N and 60°S from 1880 to 2020. Resource 8B shows the location of a population of American lobster in the North Atlantic between 1980 and 2020.

(a) Using Resource 6, describe the changes to the position of the ice front of the Larsen B Ice Shelf, Antarctica, from 1947 to 2002. [5]

(b) Explain how changes in ice sheet and one other natural factor can influence temperatures through feedback mechanisms. [4]

(c) Using Resource 7, describe the distribution of the number of people living on land predicted to be below sea level by 2100. [5]

(d) Describe the changes in the mean sea surface temperatures compared to the 20th century average shown in Resource 8A. [4]

(e) With reference to Resource 8B, suggest possible impacts of climate change on aquatic ecosystems. [4]

Section C

Answer **two** questions

4 'States play a more important role than firms in responding to climate change.'

Evaluate this statement. [13]

5 Evaluate the success of the strategies used to address the issues faced by elderly living in cities. [13]

6 'Strategies to improve the lives of slum dwellers have never been successful in cities.'

Evaluate this statement. [13]
