Resource 6 for Question 2

The relationship between GDP per capita and the prevalence of undernourishment and TB incidence per 100 000 population, 2021

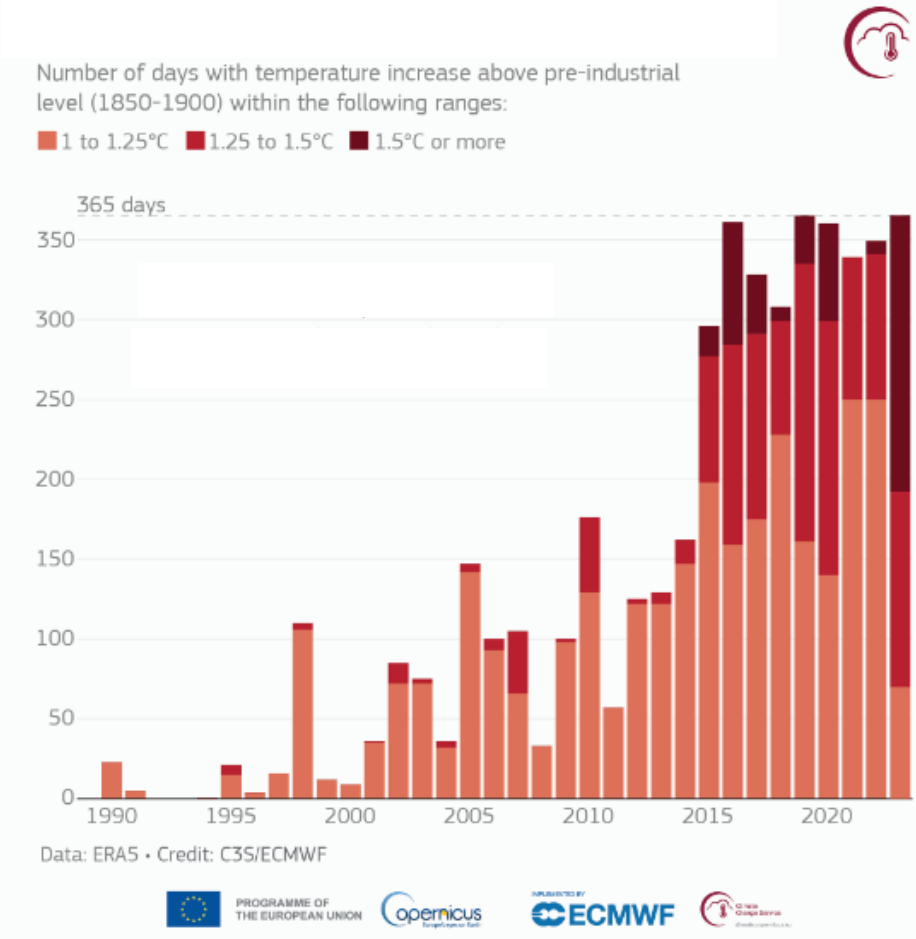

Source: https://www.who.int/teams/global-tuberculosis-programme/tb-reports/global-tuberculosis-report-2022/uhc-tb-determinants/6-3-tb-determinants#fig--6-3-1

Note: The Tuberculosis (TB) bacterium is spread through the air when an infected person sneezes, coughs or talks. It can be easily transmitted in confined spaces and can remain dormant in the body for months or years without becoming an active disease.

Resource 7 for Question 3

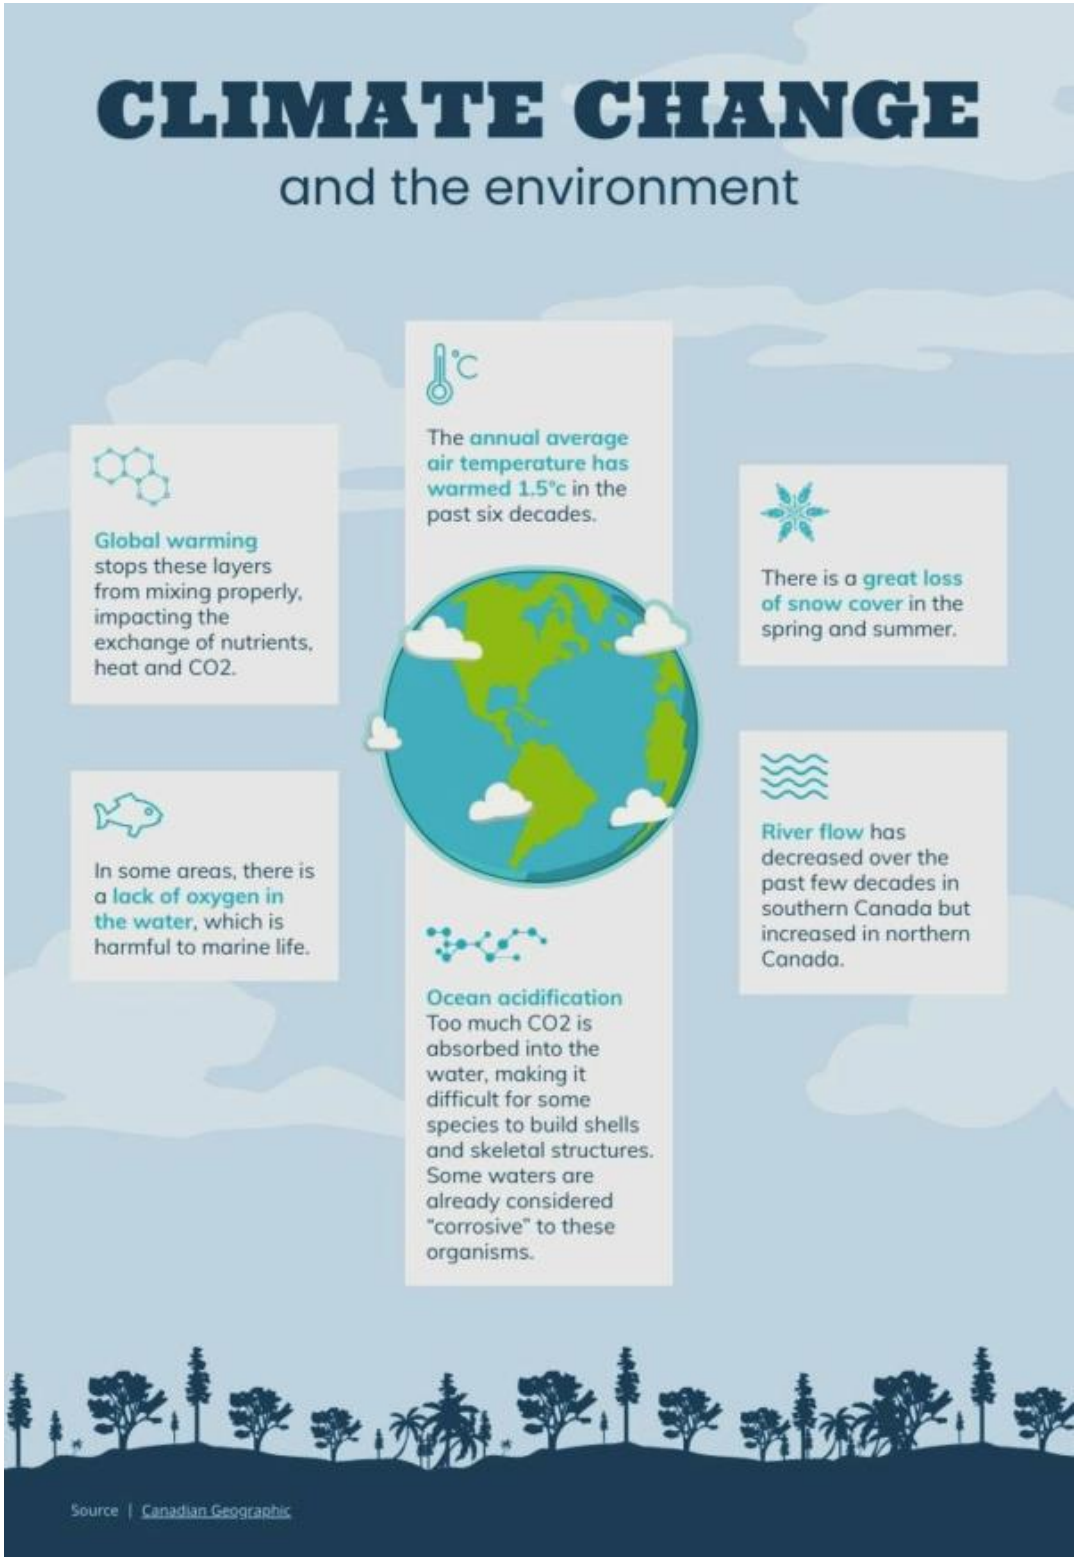

Number of days with temperature increase above pre-industrial levels between 1990 to 2023

The number of days during which the temperature exceeded the average for 1850-1900, the designated pre-industrial reference period, by more than 1°C, from the years 1990 to 2023. The plot highlights temperature increases within three ranges: 1–1.25°C (orange), 1.25–1.5°C (red), and 1.5°C or more (crimson). Source: ERA5. Credit: C3S/ECMWF
