Paper 1

29 August 2025

3 hours

Additional Materials: Insert

READ THESE INSTRUCTIONS FIRST

An answer booklet will be provided with this question paper. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper ask the invigilator for a continuation booklet.

Section A.
Answer both questions.

Section B.
Answer **two** questions, **one** from each cluster.

The number of marks is given in brackets [ ] at the end of each question or part question.

Section A

Answer **both** questions.

Cluster 1: Development, Economy and Environment

1 Resource 1 shows the locations of dams along the Yarlung Tsangpo (China)-Brahmaputra River (India and Bangladesh), and associated tributaries. China's proposed Medog Dam is also shown. Resource 2 shows the share of countries' electricity production that came from hydropower in 2022. Resource 3 is a fact file on China, India and Bangladesh.

(a) Explain how hydropower can help China achieve sustainable development. **[3]**

(b) With reference to Resource 1, describe the distribution of dams along the Yarlung Tsangpo-Brahmaputra River. **[4]**

(c) With reference to Resource 1, explain how the proposed Medog Dam may negatively impact the Ganges-Brahmaputra Delta. **[5]**

(d) With reference to Resources 1 and 2, suggest reasons for the differences in the countries' share of electricity production that came from hydropower. **[6]**

(e) With reference to Resources 1 and 3, outline possible conflicts between China, India and Bangladesh due to the proposed Medog Dam. **[6]**

(f) Explain the strategies used to manage conflicts over transboundary water resources. **[6]**

[Turn over

Cluster 2: Tropical Environments

2 Resources 4A and 4B show the climographs for Cherrapunji and Mumbai in India. Resource 5 shows monsoon circulation over India in July and January. Resource 6 shows the structural characteristics of a 'monsoon low' and tropical cyclone. Resource 7 shows India's summer monsoon (wet monsoon) rainfall between 1871 and 2023 and El Niño and La Niña years.

(a) Cite data from Resources 4A and 4B to compare the climate characteristics of Cherrapunji and Mumbai. **[4]**

(b) With reference to Resource 5, suggest reasons for the climate characteristics of Cherrapunji and Mumbai shown in Resources 4A and 4B. **[6]**

(c) With reference to Resource 6, describe two differences between 'monsoon lows' and tropical cyclones. **[4]**

(d) Explain how tropical cyclones may impact the storages in drainage basin systems. **[6]**

(e) Describe the relationship between the El Niño and La Niña phases and summer monsoon rainfall in India shown in Resource 7. **[5]**

(f) Explain the influence of the El Niño Southern Oscillation (ENSO) on rainfall in the tropics. **[5]**

[Turn over

Section B

Answer **either** question 3 **or** question 4 and answer **either** question 5 **or** question 6.

Cluster 1 Development, Economy and Environment

3 Evaluate the key factors that influence the extent to which provisioning services support population growth as outlined by Thomas Malthus and Ester Boserup. **[20]**

4 'Variations in the level of development of countries are mainly influenced by Global Production Networks (GPNs) of Transnational Corporations (TNCs).'

Evaluate this statement. **[20]**

Cluster 2 Tropical Environments

5 'Controlling the occurrence of fluvial floods is impossible.'

Evaluate this statement. **[20]**

6 Evaluate the factors causing mass movement in the humid tropics. **[20]**
