Paper 1

27 August 2026

3 hours

Additional Materials: Insert
Cover Sheet
Answer Paper

READ THESE INSTRUCTIONS FIRST

You should follow the instructions on the cover sheet. If you need additional answer paper, ask the invigilator.
Write your index number and name on the work you hand in.
Write in dark blue or black pen on both sides of the paper.
You may use an HB pencil for any diagrams or graphs.
Do not use staples, paper clips, glue or correction fluid.

Answer Question 1 in **Section A**.
Answer both questions in **Section B**.
Answer **two** questions in **Section C.**

Start your answer to each question on a fresh sheet of answer paper.

The number of marks is given in brackets [ ] at the end of each question or part question.

At the end of the examination, your answers should be separated and securely fastened into **3 bundles**. Attach the cover sheet on top of Bundle 1.

- Bundle 1: Cover sheet, answers to Question 1 and answers to Section C.
- Bundle 2: Answers to Question 2
- Bundle 3: Answers to Question 3

This document consists of **4** printed pages and **1** Insert.

Section A

Cluster 2 Fieldwork

1 A group of nine students conducted a fieldwork investigation on the community response to the expansion of cycling paths in Ang Mo Kio, Singapore. The focus of their investigation was to assess whether the expansion of dedicated cycling paths has increased the number of residents cycling for daily transport. The hypothesis for their study was:

The expansion of cycling paths in Ang Mo Kio has made it more convenient for residents who cycle for daily transport.

The students conducted the investigation over one weekday in March. Three sites were selected along the current network of cycling paths: Site A, Site B and Site C.

At each site, the students split into groups of three and conducted a count of cyclists passing along the cycling path over one hour. They also administered a questionnaire to any residents whom they saw at the sites to find out about their cycling habits and their views on the cycling paths. A total of 45 respondents participated in the survey across the three sites. The students also took photographs of the conditions along the cycling paths.

Resource 1 is a map of Ang Mo Kio showing the cycling path network and the locations of the fieldwork sites. Resource 2 shows the three fieldwork sites. Resource 3 shows the questionnaire used to survey residents. Resource 4 shows selected results from the cyclist counts at different sites.

(a) Explain **one** strength and **one** weakness in the students' hypothesis. [4]

(b) With reference to Resources 1 and 2, explain how the students could minimise the risks associated with their fieldwork. [6]

(c) Explain the benefits of selecting three different sites for this investigation. [4]

(d) With reference to Resource 3, suggest improvements to the questionnaire. [3]

(e) Suggest a suitable method to present the data shown in Resource 4. Justify your choice. [3]

(f) The students concluded that the expansion of cycling paths has increased the number of residents who cycle. Evaluate the validity of their conclusion. [10]

Section B

Cluster 1: Sustainable Future and Climate Change

Answer **both** questions

2 Resource 5 shows the world's 20 most liveable cities ranked. Resource 6 shows a news article on the proposed redevelopment of Gillman Barracks and Maju Forest. Resource 7 shows the changes in childless elderly people living alone from 2024 to 2050.

(a) Describe the distribution of the world's 20 most liveable cities shown in Resource 5. [5]

(b) Describe the factors influencing liveability of a place. [4]

(c) Using Resource 6, explain the possible trade-offs between the different dimensions of sustainable urban development. [6]

(d) With reference to Resource 7, describe the changes in childless elderly people living alone from 2024 to 2050. [3]

(e) Suggest **two** strategies to address the issues faced by the elderly living in cities. [4]

3 Resource 8 shows the carbon dioxide emissions from fossil fuels and land-use change in the United States, China and Brazil from 1850 to 2024. Resource 9 shows the projected global greenhouse gas emissions and future warming scenarios varying by actions taken. Resource 10 shows the partnership between the World Wildlife Fund (WWF), a non-governmental organisation (NGO), and IKEA, a transnational corporation, in responding to climate change through the promotion of climate projects and sustainable business practices.

(a) Compare the changes in carbon dioxide emissions from fossil fuels and land-use change among the United States, China and Brazil between 1980 and 2024, as shown in Resource 8. [4]

(b) Using Resource 8, explain how humans have contributed to contemporary climate change. [5]

(c) With reference to Resource 9, compare the future trends in the projected global greenhouse gas emissions under different scenarios. [4]

(d) Using Resource 9, explain why future impacts of climate change are uncertain. [4]

(e) With reference to Resource 10, explain how partnerships between firms and NGOs can enhance responses to climate change. [5]

Section C

Cluster 1: Sustainable Future and Climate Change

Answer **two** questions.

4 Evaluate the success of urban reimaging strategies across places. [13]

5 'Mitigation strategies are the most effective means to manage the issue of climate change.'

Evaluate this statement. [13]

6 'High rates of urbanisation pose the greatest challenge to achieving sustainable urban development.'

Evaluate this statement. [13]
