INSERT

3 hours

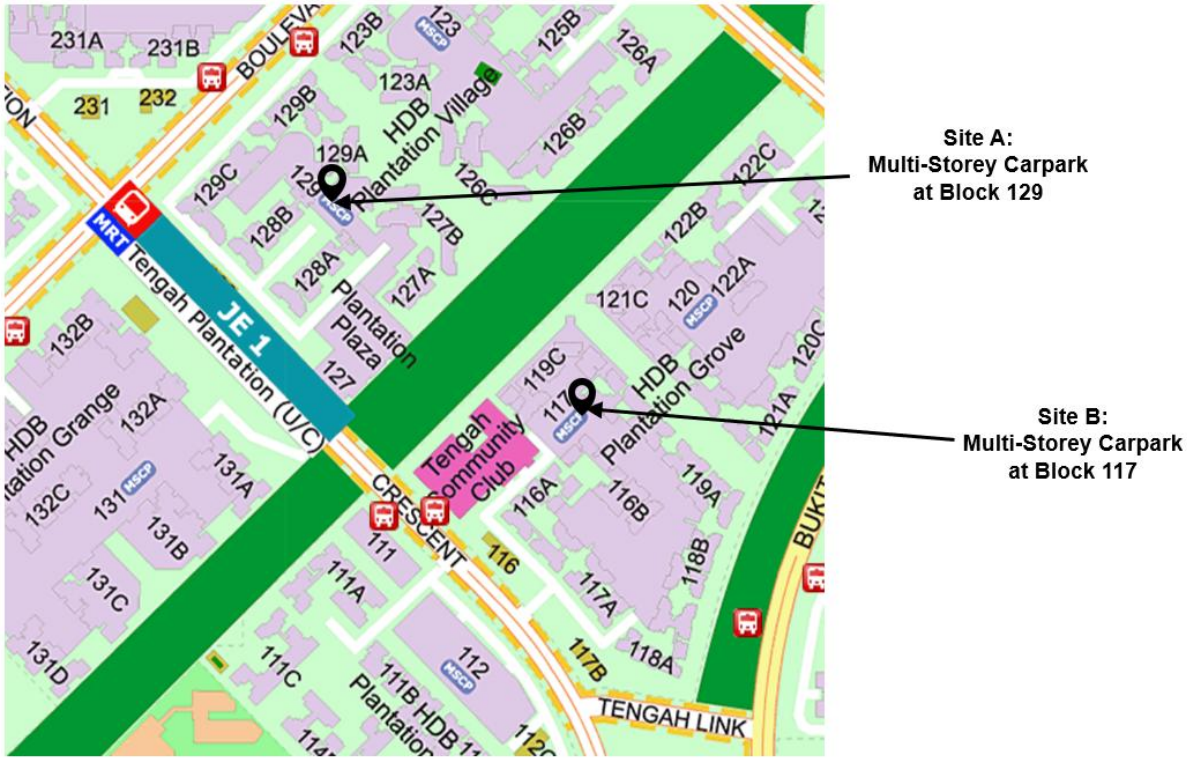

READ THESE INSTRUCTIONS FIRST

This Insert contains all the Resources referred to in the questions.

This document consists of **8** printed pages.

Resource 1 for Question 1

The locations of the two investigative sites (Sites A and B) in Tengah

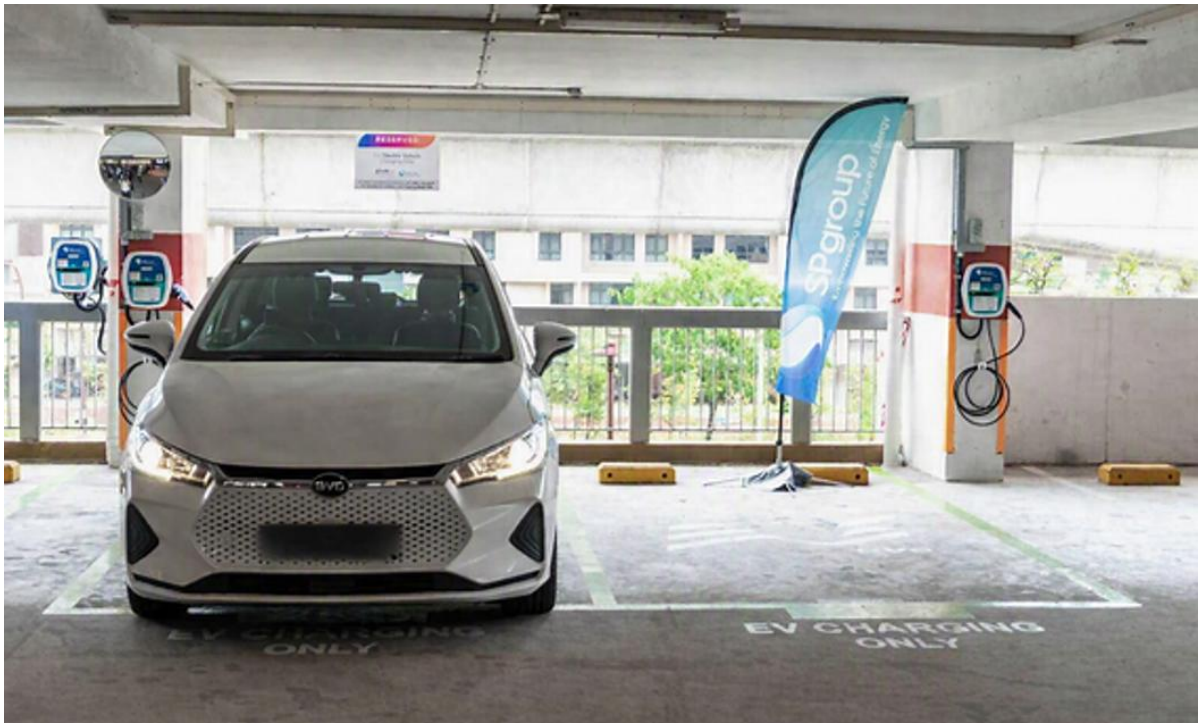

Resource 2 for Question 1

Photographs of Sites A and B

Site A

Site B

Resource 3 for Question 1

Questionnaire used by the students

Questionnaire on the Use of Electric Vehicles (EVs)

1. What is your age group?
   - 20-39
   - 40-59
   - 60 and above

2. How long have you owned an EV?
   - Less than 1 year
   - 1-3 years
   - More than 3 years

3. The main reason for purchasing an EV
   - Reduce carbon emissions
   - Lower fuel costs
   - Attractive government subsidy
   - Better driving performance

4. How difficult is it to find an available EV charging point in Tengah?
   - Very difficult
   - Difficult
   - Neutral
   - Easy
   - Very easy

5. What is the main challenge of driving an EV?
   - Limited charging infrastructure in Singapore
   - Long charging time
   - High purchase cost
   - Battery lifespan concerns
   - Lack of repair services

6. Does the availability of EV charging stations influence your decision to own an EV?
   - Strongly
   - Somewhat
   - Little
   - Not at all

7. Do you believe EVs can effectively help Singapore to cut carbon emissions?
   - Strongly disagree
   - Disagree
   - Neutral
   - Agree
   - Strongly agree

Resource 4 for Question 1

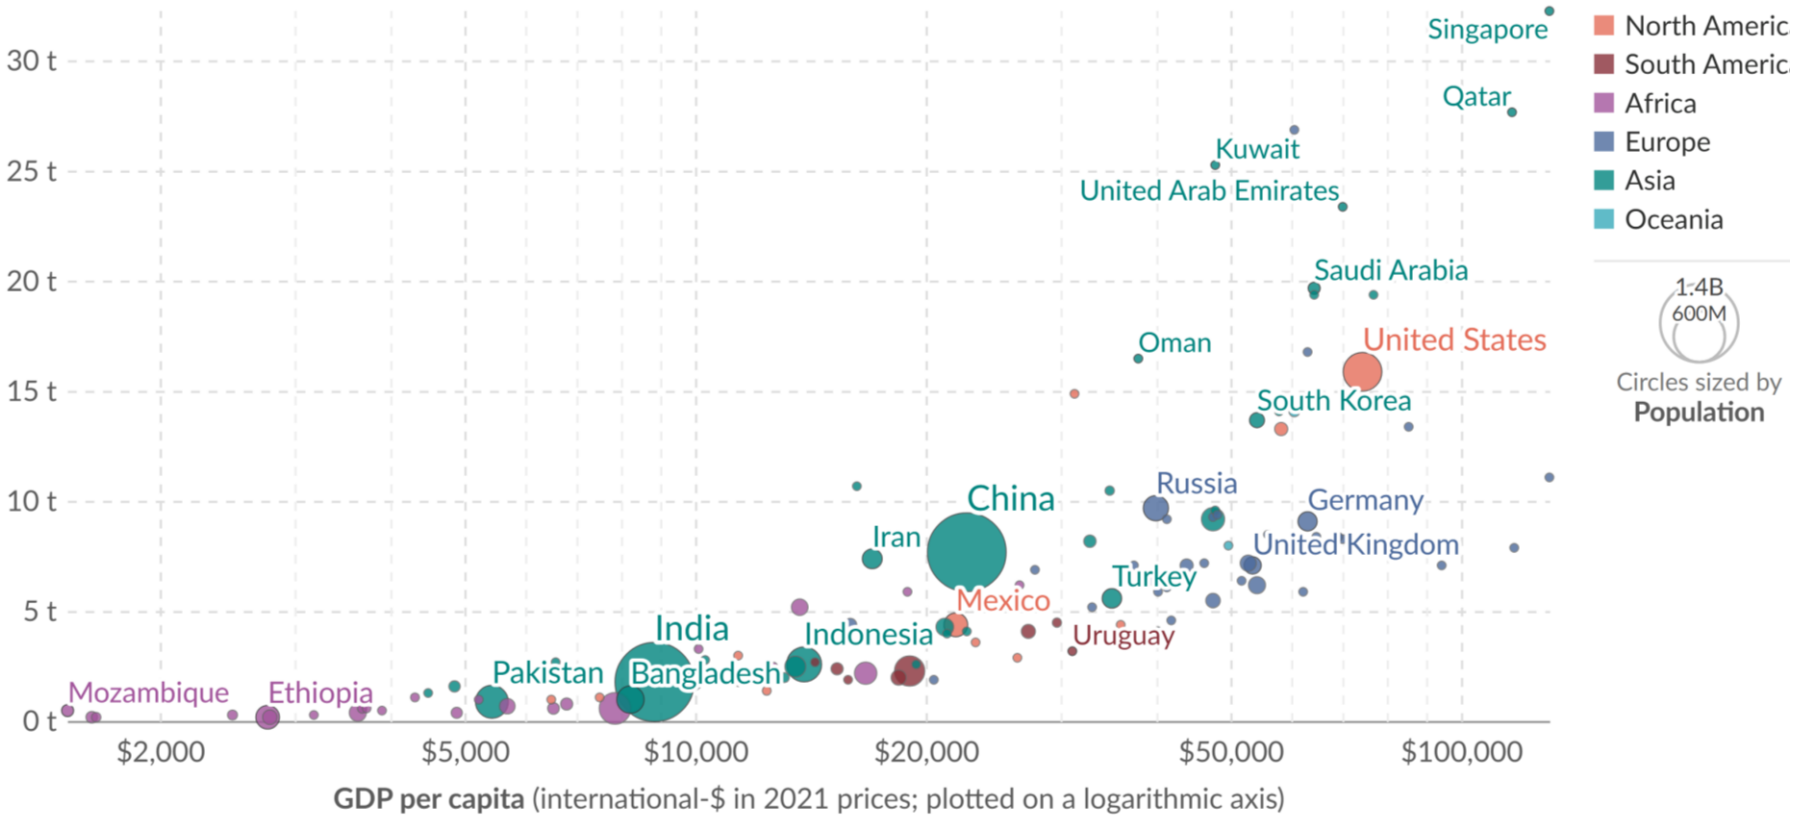

Results for selected questions in the questionnaire

	Survey question	Response	Number of respondents
Question 4	Difficulty finding an available EV charging point in Tengah	Very difficult	2
		Difficult	6
		Neutral	7
		Easy	11
		Very easy	4
Question 6	Does availability of EV charging stations influence your decision to own an EV?	Strongly	13
		Somewhat	10
		Little	5
		Not at all	2
Question 7	EVs can effectively help Singapore to cut carbon emissions	Strongly disagree	2
		Disagree	2
		Neutral	6
		Agree	11
		Strongly agree	9
	Total respondents		**30**

Resource 5 for Question 2

Consumption-based CO_2 emissions versus gross domestic product (GDP) per capita in 2023

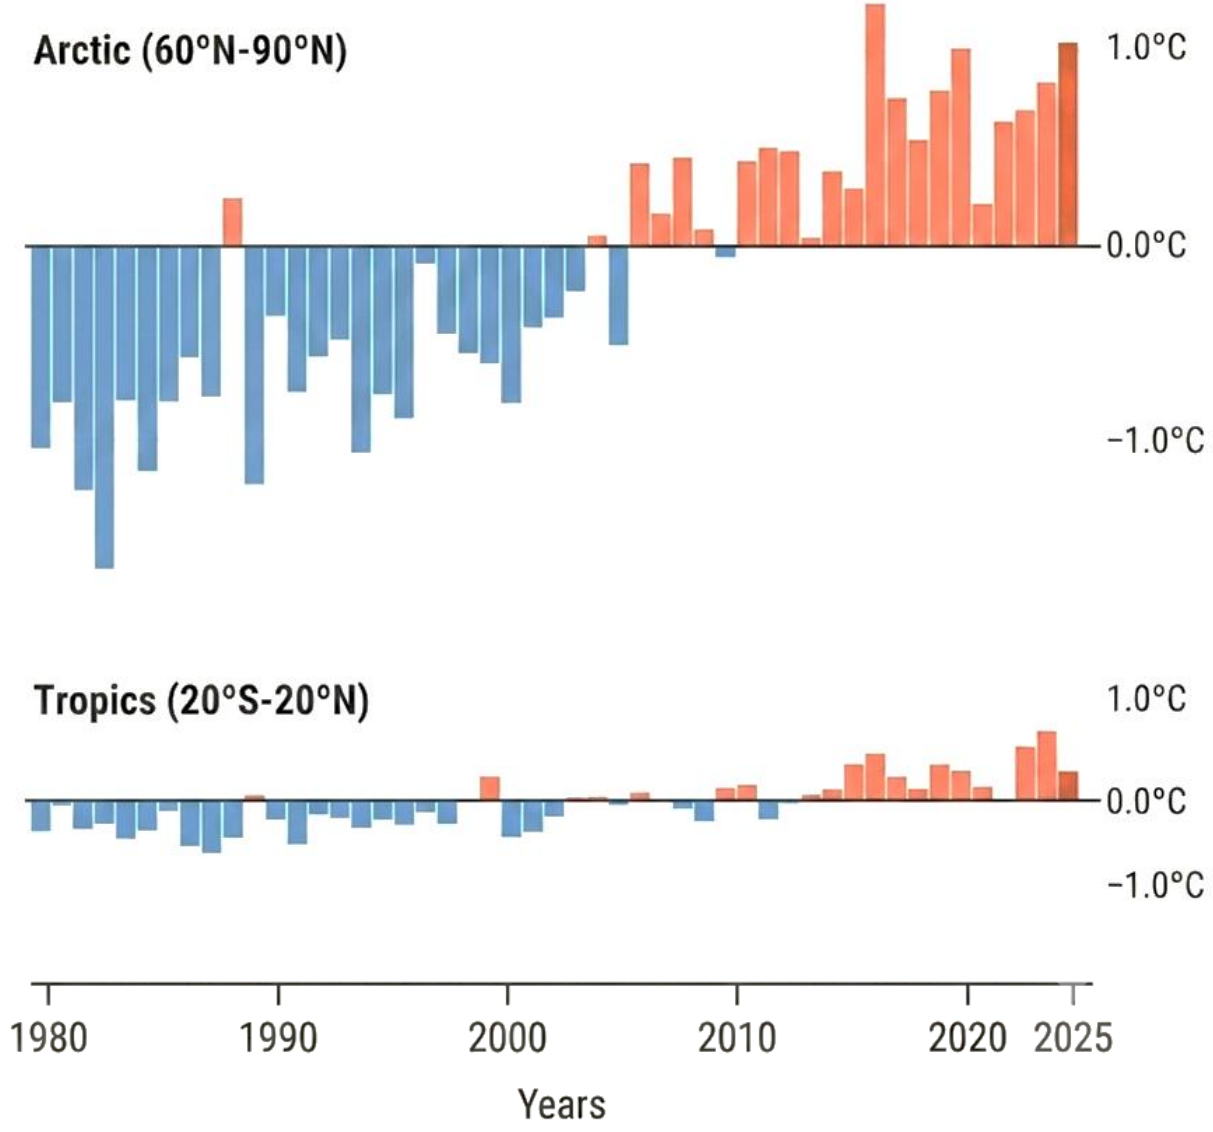

Consumption-based emissions[1] are measured in tonnes per person. They are territorial emissions minus emissions embedded in exports, plus emissions embedded in imports. GDP per capita is adjusted for inflation and differences in living costs between countries.
