Paper 2

14 September 2026

3 hours

Additional Materials: Insert
Cover Sheet
Answer Paper

READ THESE INSTRUCTIONS FIRST

You should follow the instructions on the cover sheet. If you need additional answer paper, ask the invigilator.
Write your index number and name on the work you hand in.
Write in dark blue or black pen on both sides of the paper.
You may use an HB pencil for any diagrams or graphs.
Do not use staples, paper clips, glue or correction fluid.

Section A
Answer **Question 1.**

Section B
Answer **Question 2.**

Section C
Answer **one** question.

The number of marks is given in brackets [ ] at the end of each question or part question.

Start your answer to each question on a fresh sheet of answer paper.

At the end of the examination, your answers should be separated and securely fastened into **3 bundles**. Attach a cover sheet on top of bundle 2.

- Bundle 1: Cover sheet and answers to Question1.
- Bundle 2: Answers to Question 2
- Bundle 3: Answers to Section C.

This document consists of **4** printed pages.

© ACJC 2026

Answer Questions 1 and 2 and
EITHER Question 3 **OR** Question 4

Section A

Cluster 4 Fieldwork

1 A group of six Geography students conducted a fieldwork investigation into the community's response to electric vehicle (EV) adoption in the neighbourhood of Tengah. The investigation aimed to examine how government incentives have encouraged EV adoption.

Their investigation sought to answer the following research question:

To what extent does the availability of EV charging infrastructure influence community responses towards EV adoption in Tengah?

The students selected two EV charging sites for their investigation: a multi-storey carpark at Block 129 (Site A) and a multi-storey carpark at Block 117 (Site B). On a Saturday, from 9.00 a.m. to 3.00 p.m., they conducted a questionnaire with 30 EV owners using the charging facilities at the two sites to find out their opinions. The students waited until EV owners had parked at the charging lots before approaching them to participate in the survey.

Resource 1 shows the locations of the two investigation sites (Sites A and B) in Tengah. Resource 2 shows photographs of Sites A and Site B. Resource 3 shows the questionnaire used by the students. Resource 4 shows the results for selected questions in the questionnaire.

(a) Explain **one** strength and **one** weakness of the research question for the students' investigation. [4]

(b) Suggest how the students could minimise potential risks while conducting the questionnaire at the sites shown in Resources 1 and 2. [5]

(c) Explain **three** ethical considerations that the students should take into account when conducting their questionnaire survey. [6]

(d) Explain the strengths and weaknesses of the questionnaire shown in Resource 3. [6]

(e) Using Resource 4, sketch a suitable method to represent the data on EV owners' responses to Question 7. Justify your choice of method. [5]

(f) Suggest **two** other types of primary data that could be collected to complement the questionnaire findings in answering the research question. [4]

(g) Using all the Resources, evaluate the validity of the students' fieldwork. [10]

Section B

Cluster 3 Sustainable Future and Climate Change

2 Resource 5 shows the consumption-based CO_2 emissions versus gross domestic product (GDP) per capita in 2023. Resource 6 shows temperature changes in the Arctic and the tropics between 1980–2025 compared to the reference average temperature of 1990–2020. Resource 7 shows an infographic on climate change impacts.

(a) With reference to Resource 5, explain **two** anthropogenic causes of contemporary climate change. [5]

(b) Compare the temperature changes in the Arctic and the tropics between 2000 and 2025 shown in Resource 6. [4]

(c) Describe **two** climate feedback mechanisms that contribute to the observed patterns of temperature changes shown in Resource 6. [4]

(d) Explain the challenges faced when making predictions of future impacts of contemporary climate change. [6]

(e) With reference to Resource 7, explain how climate change impacts vary across different groups of people. [7]

(f) Suggest **two** strategies that cities can use to improve the lives of slum dwellers. [4]

Section C

Answer EITHER Question 3 OR Question 4

3 'Partnerships between the different actors are more important than the actions of any single actor in responding effectively to climate change.'

Evaluate this statement. [20]

4 Evaluate the success of strategies used to manage non-hazardous solid waste in urban areas. [20]
