Paper 2
INSERT

9173/02

16 September 2026

3 Hours

READ THESE INSTRUCTIONS FIRST

The Insert contains all the Resources referred to in the questions.

Resource 1 for Question 1

Map of the neighbourhood within the Thomson-Sin Ming area

Resource 2 for Question 1

Interview questions

Name: _____ Age: _____

Gender: _____ Race: _____

Section A

1. When did you purchase your electric vehicle?
2. What was your main consideration in purchasing an electric vehicle?
   If response is an environmental consideration, proceed to Q3. Otherwise, proceed to Q4.
3. How do you think driving an electric vehicle might help the environment?
4. Do you think the consideration you've provided is more important than environmental reasons such as combatting climate change? Why?

Section B

5. Among all the ways in which we can combat climate change (e.g. installing solar panels on rooftops, greening our urban environment etc), how much of a difference does driving an electric vehicle make?

Huge difference	Some difference	Slight difference	No difference

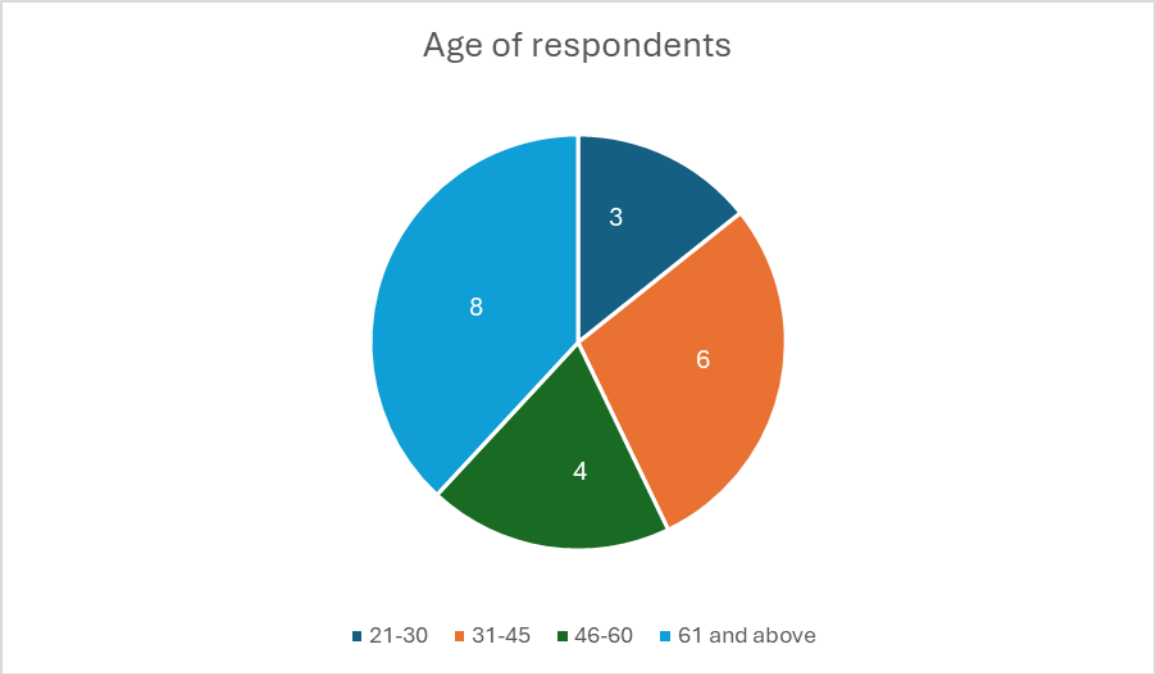

6. Why do you say so?
7. How many of your peers currently drive an electric vehicle?

76-100%	51-75%	26-50%	0-25%

8. Do you think explaining to your peers about the environmental benefits of electric vehicles will convince them to switch to electric vehicles?

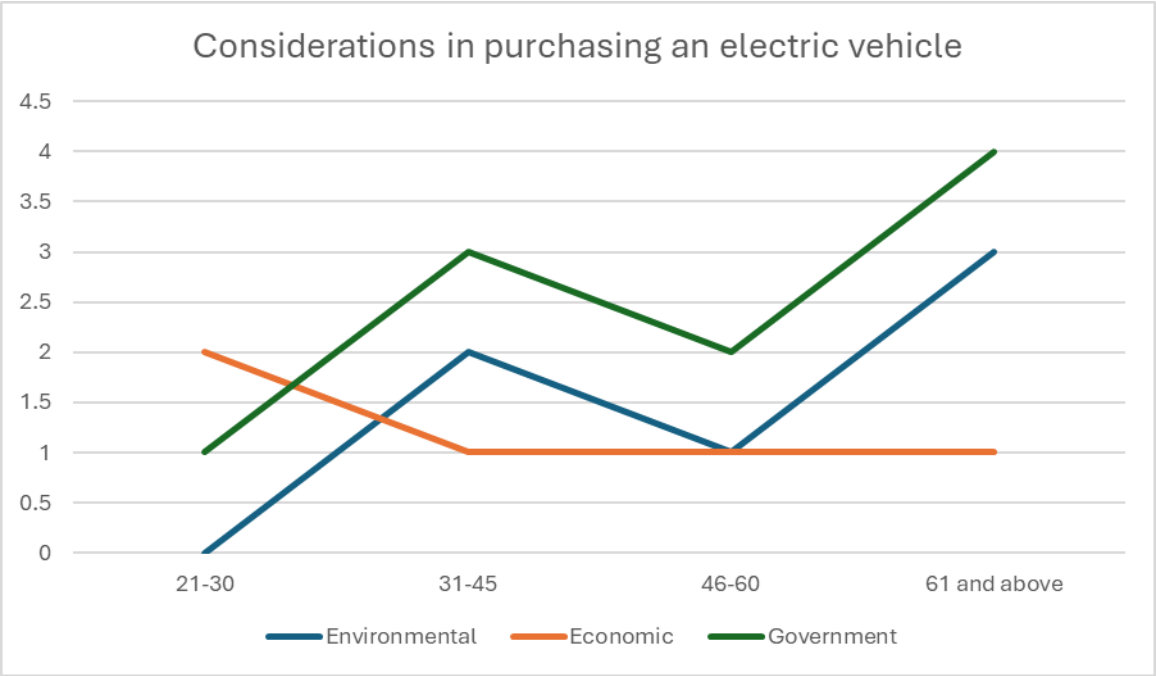

Resource 3 for Question 1

Pie chart of age of respondents

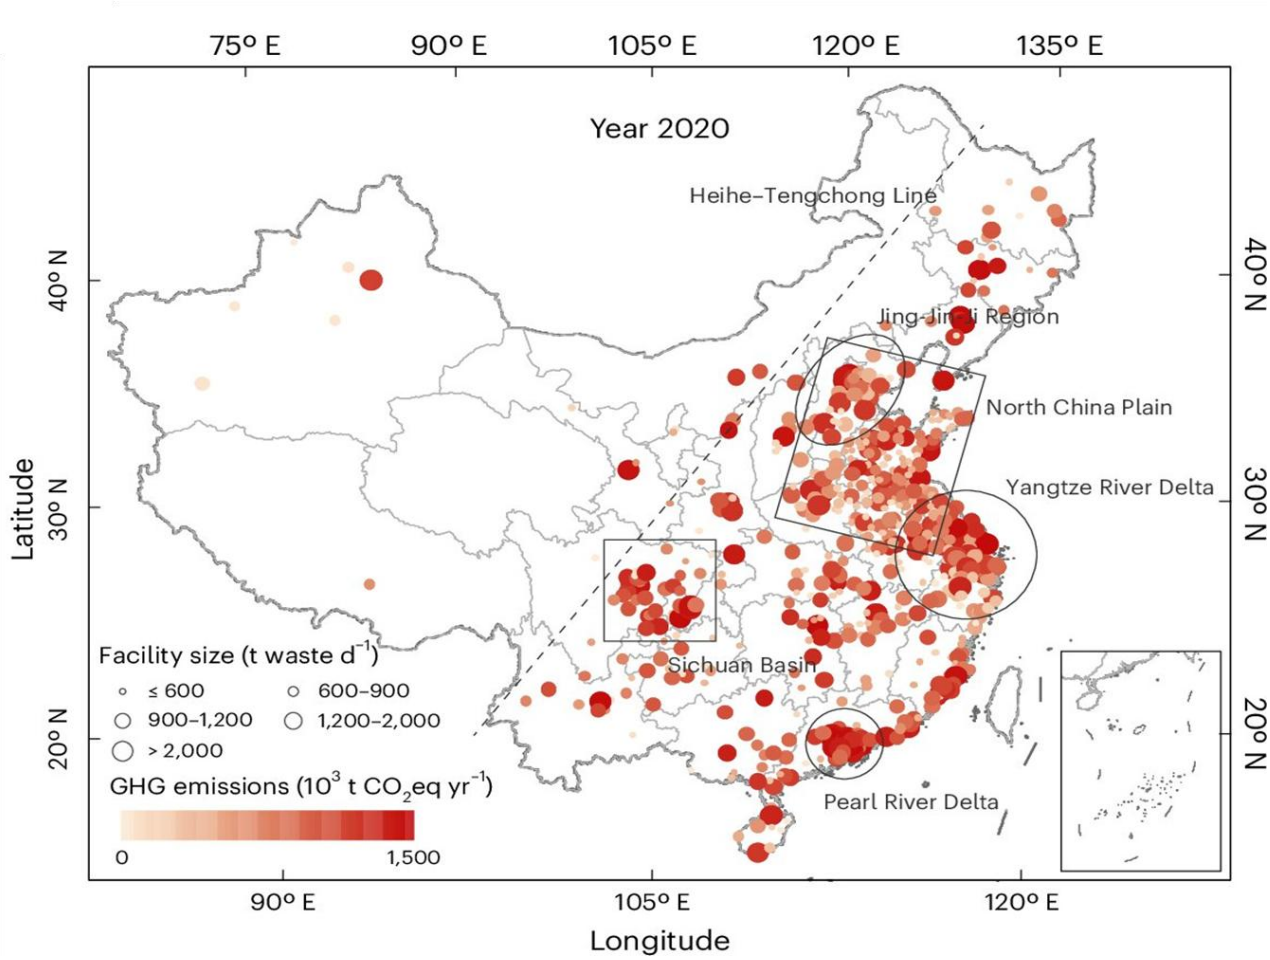

Resource 4 for Question 1

Line graph for considerations in purchasing an electric vehicle

Resource 5 for Question 2

Greenhouse Gas (GHG) emissions from Waste-to-Energy (WtE) plants in China, 2020

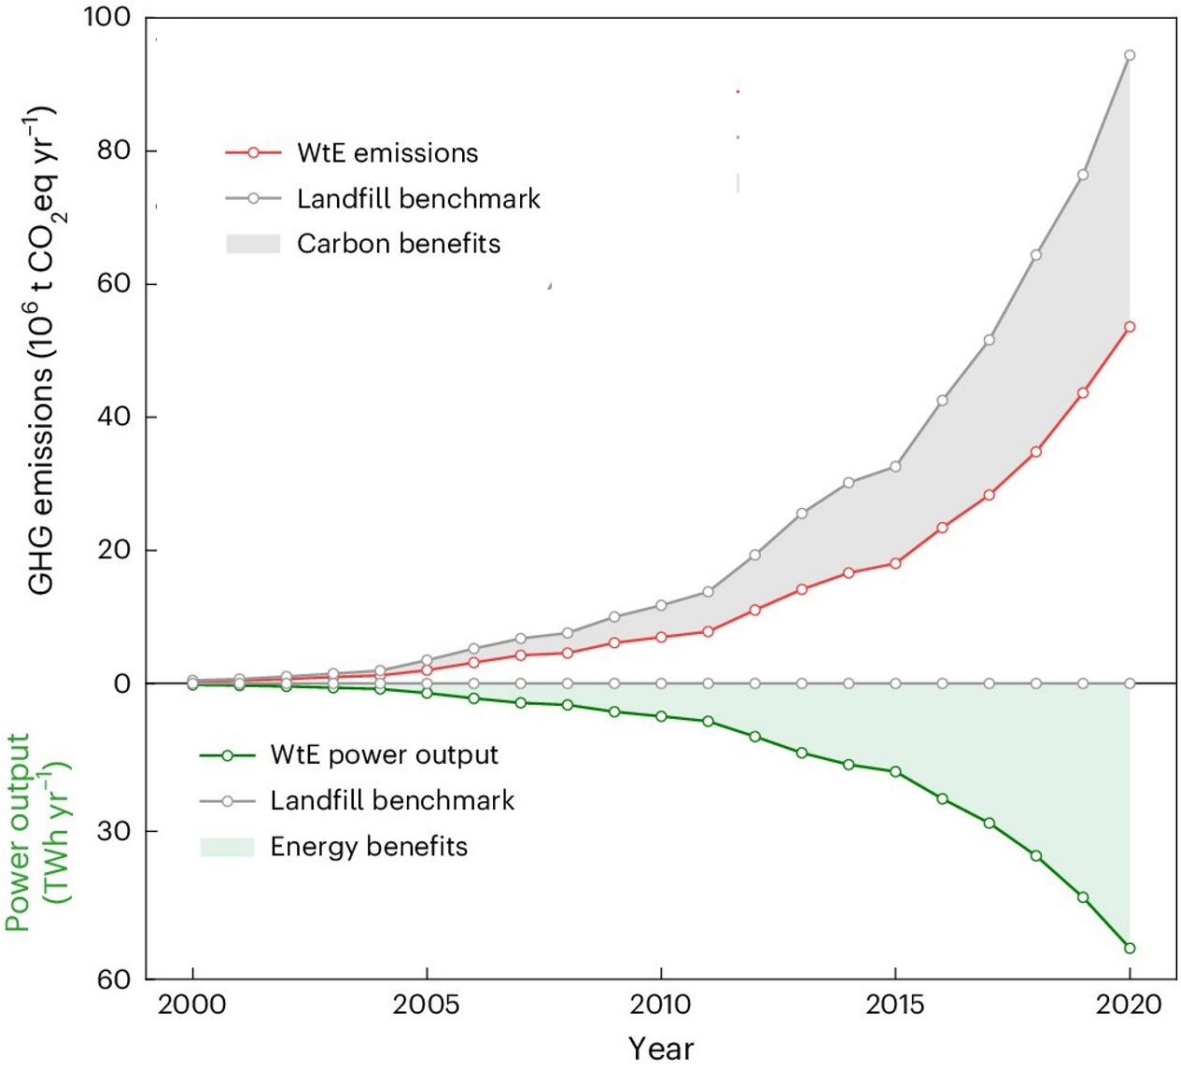

Legend:

- t waste d^{-1}: tonnes per day
- 10^3 t CO_2eq yr^{-1}: thousands of tonnes of carbon dioxide equivalent emitted per year

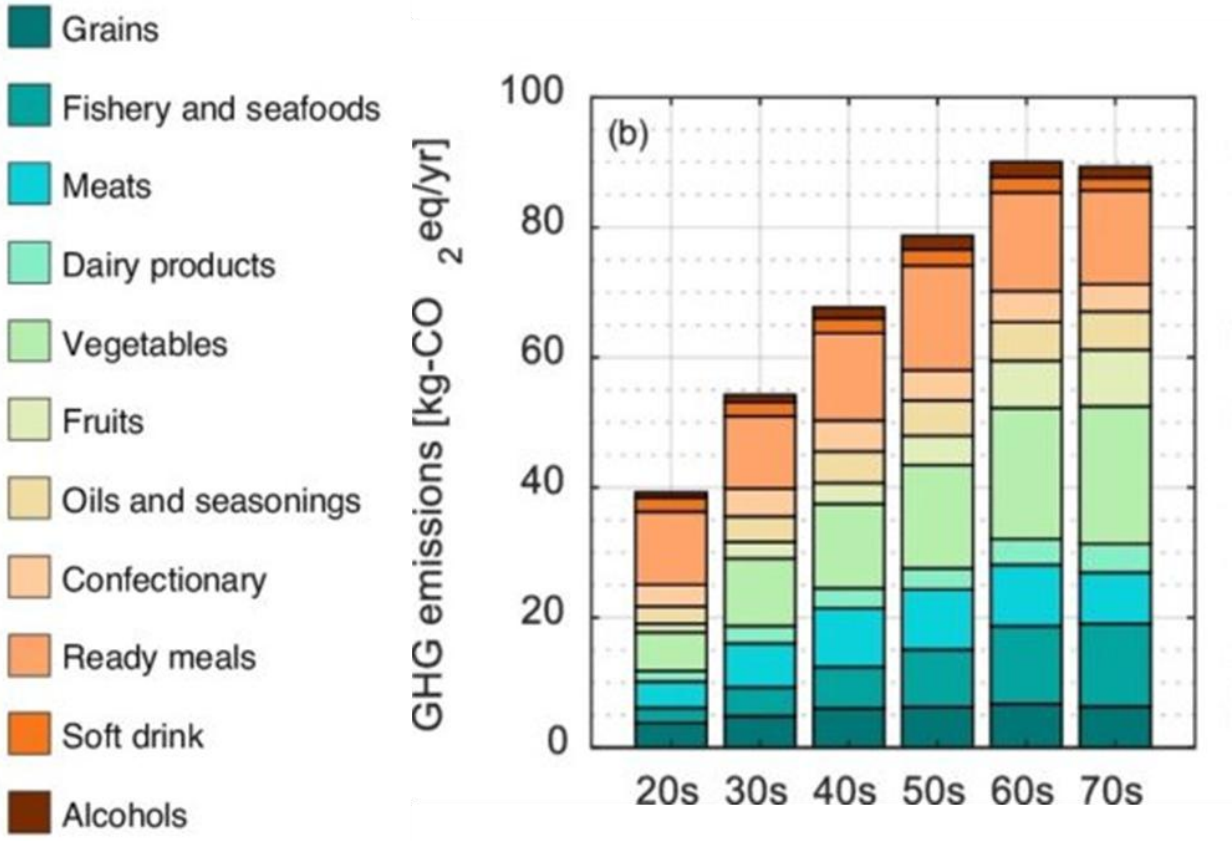

Resource 6 for Question 2

Benefits of Waste-to-Energy (WtE) plants over landfills

Resource 7 for Question 2

Types of food waste and GHG emissions across different age groups

Note:

- kg-CO_2 eq/yr: kilograms of carbon dioxide equivalent per year

Resource 8 for Question 2
