29 August 2025
3 hours

Additional Materials: Insert

READ THESE INSTRUCTIONS FIRST

An Answer Booklet will be provided with this question paper. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper, ask the invigilator for a continuation booklet.

Write your Centre number, index number and name on the work you hand in.

Write in dark blue or black pen on both sides of the paper.
You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO **NOT** WRITE ON ANY BARCODES.

Answer Question 1 in **Section A**.
Answer both questions in **Section B**.
Answer **two** questions in **Section C**.

The number of marks is given in brackets [ ] at the end of each question or part question.

Section A

Cluster 2 Fieldwork

1 A group of four students carried out fieldwork to investigate whether Randwick, a suburb in Sydney, supports the psychological well-being of its elderly residents. Their investigation focused on two aspects — sense of community and perceived safety. Their hypothesis was:

Elderly residents in Randwick feel a strong sense of community and personal safety in their neighbourhood.

The students approached elderly residents at Alison Park and Royal Randwick on a weekday afternoon. They surveyed 18 residents aged 67 to 84 using a short questionnaire containing both closed and open-ended questions about their interactions with neighbours, participation in local activities, and feelings of safety in public areas. Four of these residents agreed to participate in brief, informal interviews to elaborate on their experiences.

The group also split up to conduct observations at four public spaces commonly used by the elderly.

- Royal Randwick
- Randwick City Library
- St. Basil's Centre
- Alison Park

They used a checklist to assess features such as lighting, seating, visibility, cleanliness, and number of users.

Resource 1 is a map of Randwick showing the data collection sites. Resource 2 shows photographs of selected public spaces. Resource 3 shows the questionnaire used. Resource 4 shows selected findings from the survey and observations.

(a) Explain one weakness and one strength of the students' hypothesis. [4]

(b) With reference to Resources 1 and 2, explain the possible risks the students might face during the investigation. [3]

(c) With reference to Resource 2, suggest how the students could minimise the impact of their investigation on the community. [4]

(d) With reference to Resource 3, explain how the questionnaire might help the students collect accurate data for their investigation. [5]

(e) With reference to Resource 4A, describe the elderly's perceptions of sense of community and safety in their neighbourhood. [4]

(f) Evaluate the validity of the students' investigation. [10]

Section B

Cluster 1 Sustainable Future and Climate Change

Answer **both** questions

2 The EIU's index assesses 173 cities worldwide across 30 indicators, categorised into stability, healthcare, culture and environment, education and infrastructure.

Resource 5 shows a map depicting the world's most and least liveable cities in 2025. Resource 6 shows the performance of the most liveable cities in the EIU categories, in 2025. Resource 7 shows a photograph of a street in Vancouver.

(a) Describe the distribution of the world's most and least liveable cities in 2025 shown in Resource 5. [4]

(b) Compare the performance of Copenhagen and Vancouver in the liveability categories shown in Resource 6. [4]

(c) Explain how Copenhagen's performance in liveability categories shown in Resource 6 can influence the well-being of elderly women in the city. [4]

(d) With reference to Resources 6 and 7, suggest how Vancouver can improve its liveability. [4]

(e) Explain how climate change can impact liveability rankings. [6]

3 Resource 8 shows the perceptions of countries on climate change. Resource 9 shows carbon dioxide emissions by income level from 1946 to 2023. Resource 10 shows changes in agricultural productivity because of climate change.

(a) Cite data from Resource 8 to compare low- and high- income countries' perceptions of climate change. [5]

(b) Explain the evidence of past climate variability derived from proxy indicators. [4]

(c) Describe the changes in carbon dioxide emissions over time shown in Resource 9. [5]

(d) With reference to Resource 10, describe changes in agricultural productivity because of climate change. [4]

(e) Explain reasons for uncertainty over present and future impacts of contemporary climate change. [4]

Section C

Answer **two** questions

4 'It is possible for cities to achieve both liveability and sustainable urban development.'

Evaluate this statement. [13]

5 Evaluate the importance of partnerships between key actors in influencing the success of climate change response. [13]

6 'Climate change is the most significant issue challenging progress towards sustainable urban development.'

Evaluate this statement. [13]
