DUNMAN HIGH SCHOOL
PRELIMINARY EXAMINATION
YEAR 6

HIGHER 2 GEOGRAPHY **9173/01**

Friday **13 September 2024** **3 hours**

Additional materials: Insert

READ THESE INSTRUCTIONS FIRST

Write your name and class clearly on **all** the work you hand in.
Write in dark blue or black pen on both sides of the paper.
You may use a HB pencil for any diagrams or graphs.
Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer both questions in **Section A**.
Answer two questions in **Section B**, one from each cluster.

At the end of the examination, fasten all your work securely together.
The number of marks is given in the brackets [ ] at the end of each question or part question.

Section A

Answer **both** questions.

Cluster 1: Development, Economy and Environment

1 Resource 1 shows palm oil production by country in 1992 and 2022. Resource 2 shows a fact file on Indonesia and Malaysia in 2022. Resource 3 shows solar and hydroelectric generation in USA from 2019 to 2024. Resource 4 is a schematic diagram of population-resource relationship in the Sahel region in Africa.

(a) Using an example for each, explain what is meant by conditional reserves and hypothetical reserves. [4]

(b) Compare the distribution of palm oil production between 1992 and 2022 shown in Resource 1. [4]

(c) With reference to Resource 2, explain how palm oil production influences progress towards sustainable development in Indonesia and Malaysia. [6]

(d) Contrast the solar and hydroelectric generation in USA from 2019 to 2024 shown in Resource 3. [4]

(e) Suggest why solar generation in USA is likely to increase in the future as shown in Resource 3. [6]

(f) Explain how the schematic diagram in Resource 4 shows Thomas Malthus' views on population and resources. [6]

Cluster 2: Tropical Environments

2 Resource 5 shows the position of the Intertropical Convergence Zone (ITCZ) and wind systems in the tropics in January and July. Resource 6 shows the relief map of the Indian subcontinent and the rainfall received in July at locations A, B and C. Resource 7 shows a developed river channel of the Mekong River that is in flood in Cambodia. Resource 8 is a schematic diagram of the stages in the development of the river channel in Resource 7.

(a) With reference to Resource 5, describe the differences in the features of the ITCZ and wind systems in January and July. [5]

(b) With reference to Resources 5 and 6, explain the difference in the rainfall received in July for locations A, B and C in Resource 6. [6]

(c) Compare the river channel at Stage 1 with the river channel at Stage 3 as shown in Resource 8. [4]

(d) With reference to Resource 8, explain how the fluvial processes operating in the channel in Stages 2 and 3 will result in the developed channel in Resource 7. [7]

(e) Name and describe the feature labelled X and the feature between Y and Z in Resource 7. [4]

(f) With reference to Resource 7, explain how the nature of the channel and the physical processes operating in the channel affect Settlements A and B differently. [4]

Section B

Answer **either** Question 3 or Question 4 and answer **either** Question 5 or Question 6.

Cluster 1 Development, Economy and Environment

3 'It is challenging to manage conflicts over transboundary water resources.'

Evaluate this statement. [20]

4 'The GPNs of TNCs have resulted in greater interdependence between places within the global economy.'

Evaluate this statement. [20]

Cluster 2 Tropical Environments

5 Evaluate the role of geomorphic processes in the formation of karst landforms in the humid tropics. [20]

6 'Humans cannot control the occurrence of fluvial floods.'

Evaluate this statement. [20]
