TAMPINES MERIDIAN JUNIOR COLLEGE
JC2 PRELIMINARY EXAMINATION

CANDIDATE NAME

CIVICS GROUP

H1 GEOGRAPHY **8834/01**

Paper 1 **12 September 2024**
3 hours

Additional materials: 12 Page Answer Booklet
1 Insert

READ THESE INSTRUCTIONS FIRST

Write your answers in the answer booklet provided. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper ask the invigilator for a continuation booklet.

Answer **Question 1** in **Section A.**

Answer **both** questions in **Section B.**

Answer **two** questions in **Section C.**

The Insert contains all the Resources referred to in the questions.
You should make a reference to appropriate examples studied in the field or the classroom, even where the examples are not specifically requested by the question.
Diagrams and sketch maps should be drawn wherever they serve to illustrate an answer.
You are reminded of the need for good English and clear presentation in your answers.

The number of marks is given in the brackets [ ] at the end of each question or part question.

This document consists of **5** printed pages.

Section A

Answer **all** questions in this section.

Cluster 2 Fieldwork

1 The Singapore Green Plan 2030 includes a strong push to electrify our vehicle population, to help Singapore achieve our vision of 100% cleaner energy vehicles by 2040. After reading about the Singapore Green Plan, a group of 12 students wanted to find out if drivers in Tampines estate are willing to purchase electric cars for their daily use instead of the conventional petroleum-reliant cars.

They decided to conduct a study on the following hypothesis: 'Drivers in Tampines estate will buy electric cars for their daily use.'

For their investigation, they identified the electric car charging stations in Tampines via the local Land Transport Authority app. On a Monday afternoon, the students set off on their fieldwork with one group of 4 students conducting a questionnaire survey to determine the preferences of drivers stopping at a Petrol station at Site A for their choice of cars. Another group of 4 students conducted the same survey at a Housing Board Flat along Tampines Avenue 4 at Site B where there is a nearby Tesla electric car charging station. The remaining 4 students were stationed at Site C, which is the Tampines 1 shopping mall's entrance, to conduct the survey.

In collecting their data, the groups used the convenience sampling method.

Resource 1 shows a map of chosen fieldwork sites in Tampines estate. Resource 2 shows the questionnaire used by the students for the survey. Resource 3 shows selected results of the questionnaire survey.

(a) Explain why the hypothesis is appropriate for the investigation. [3]

(b) With reference to Resource 1, explain the factors that the students could consider when choosing the site to carry out the survey. [4]

(c) Referring to Resource 2, explain ethical issues that may arise due to the students' data collection at the shopping mall's entrance. [4]

(d) With reference to Resource 2, explain how the students' survey form may affect the reliability of data collected. [4]

(e) Sketch a diagram to represent the data collected shown in Resource 3. [5]

(f) Evaluate the students' investigation and explain how it can be improved. [10]

Section B

Answer **both** questions from this section.

Cluster 1 Sustainable Future and Climate Change

2 Resource 4 shows the percentage of global population living in urban areas by continent from 1950 to 2030. Resource 5 is a graph that depicts the relationship between urbanisation level and GDP per capita of some countries in the world. Resource 6 is an extract from the 2022 Sustainable Development Report.

(a) Describe the global urban population growth from 1950 to 2030 as shown in Resource 4. [4]

(b) With evidence from Resource 5, state and explain the relationship between urbanisation level and GDP per capita. [3]

(c) With reference to Resources 4 and 5, account for the high urbanisation level in the more developed regions. [4]

(d) Referring to Resource 6, explain how high urbanisation level can affect the sustainable development of the world regions. [6]

(e) Explain how urban population loss leads to challenges in progressing towards sustainable urban development. [5]

3 Resource 7 is a map showing the global waste production in 2018. Resource 8 shows the total amount of waste generated by the different economic activities in Kazakhstan, Denmark and United Kingdom in 2018. Resource 9 traces the greenhouse gas emissions from the different waste treatment during the period 1965 to 2100.

(a) Describe the global distribution in waste generation in 2018 shown in Resource 7. [4]

(b) Compare the total waste generation by the different economic activities in the three countries as shown in Resource 8. [4]

(c) Explain the challenges that cities face in reducing their plastic waste to achieve urban sustainability. [4]

(d) Describe the changes in annual greenhouse gas emissions from the different types of waste treatment during the period 1965 to 2100 shown in Resource 9. [4]

(e) Explain how the increased greenhouse gas emissions from landfills could impact the environment negatively. [6]

Section C

Answer **two** questions from this section.

4 'Allocating resources to carry out urban reimaging is a better way to improve the liveability of a city than to manage its urban slum dwellings.' Evaluate this statement. [13]

5 Evaluate the issues faced by women living in cities. [13]

6 'The firms are the most important key actor that ensures the success of strategies in response to climate change.' Evaluate this statement. [13]
