Resource 2 for Question 1

Questionnaire used by students for the survey

Questionnaire

Personal information:

(1) Age: 65 – 74 75 - 84 Above 84

(2) Gender: Male Female

(3) Do you live in the Serangoon North estate: Yes No

(4) How long have you lived in this area? _____

(5) Do you find your transport needs met? Please indicate how satisfied you are with the transport needs on a scale of 1 to 5 where 1 is not satisfied and 5 very satisfied.

Transport Need	Not satisfied				Very satisfied
Public transport (bus, MRT etc)	**1**	**2**	**3**	**4**	**5**
Frequency of Public transport	**1**	**2**	**3**	**4**	**5**
Safety on public transport service	**1**	**2**	**3**	**4**	**5**
Quality of footpaths and crossings	**1**	**2**	**3**	**4**	**5**
Other forms of transport (ride-sharing, car-sharing scheme)	**1**	**2**	**3**	**4**	**5**
Availability of transport options in times of emergency	**1**	**2**	**3**	**4**	**5**

1. What do you see as the two biggest advantages of the transport facilities in this neighbourhood?

a._____

b. _____

Thank you for your time.

Resource 3 for Question 1
Results of the questionnaire survey done on 80 elderly persons who are most satisfied with the transport needs

	By age group	Total number
Public transport (bus, MRT etc)	65-74	24
	75-84	12
	Above 84	2
Frequency of Public transport	65-74	20
	75-84	10
	Above 84	2
Safety on public transport service	65-74	18
	75-84	9
	Above 84	2
Quality of footpaths and crossings	65-74	23
	75-84	11
	Above 84	2
Other forms of transport (ride-sharing, car-sharing scheme)	65-74	12
	75-84	2
	Above 84	0
	No Data	10
Availability of transport options in times of emergency	65-74	3
	75-84	6
	Above 84	1
	No data	7

Resource 6 for Question 2

Employment structure of cultural and creative industries in Beijing (in thousands)

	2007	2008	2009	2010	2011	2012
Cultural & artistic	48	48	52	53	74	72
Journalism and publication	167	160	156	149	151	156
Broadcasting, TV & film	46	46	48	44	55	60
Software, network, & computer service	348	398	451	516	613	698
Advertising & exhibitions	100	93	94	101	115	125
Transaction of artwork	14	17	19	22	25	28
Design service	85	78	100	109	101	119
Touring, relaxation & recreation	103	100	103	99	106	111
Other auxiliary service	114	130	126	136	169	160
Total creative industries	1025	1070	1149	1229	1409	1529
Percentage of all employees (%)	10.87	10.91	11.51	11.91	13.17	13.81

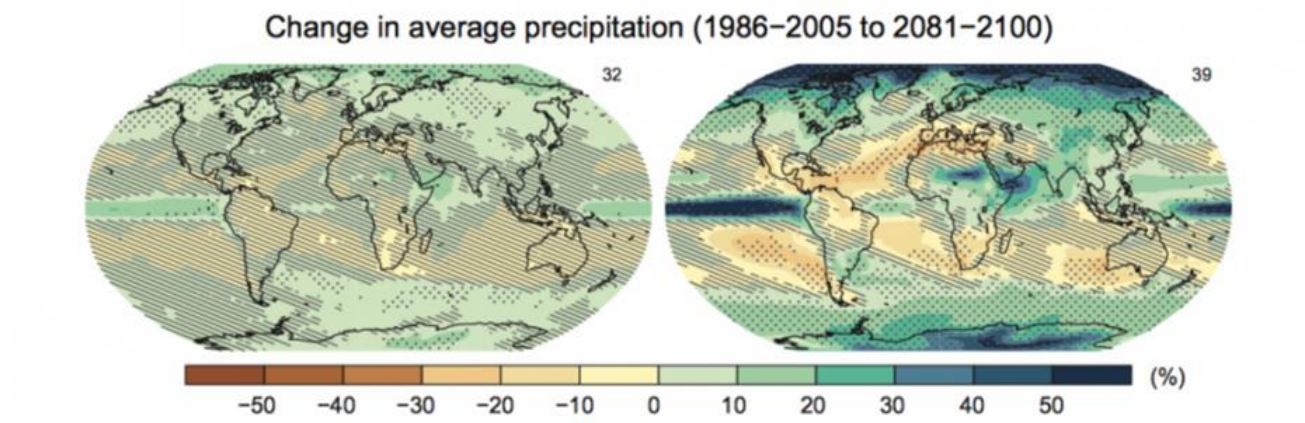

Resource 7 for Question 1

Interview extract with an artist who arrive at 798 District before 2005

The rent has risen too fast in the recent past, many art institutions and shops have left for other creative parks, and many shops have frequently changed their owner. I know the rent of some places is now 8 Yuan/m2/day. It is too expensive for us. If I did not rent this workshop as early as 2004, and if my rent contact was not as long as ten years, it would also be difficult for me to remain in Factory 798. But my contract is running out. I must seek a new place in the next year (Interview, November 2013).

Resource 8 for Question 2

Projected changes in global annual mean precipitation for a low emissions scenario (left) and high emissions scenario (right). Blue and green areas are projected to experience increases in precipitation by the end of the century, while yellow and brown areas are projected to experience decreases.

Source: IPCC, 2013

Resource 9 for Question 3

Impacts of climate change on India

Warmer seasons

- Average temperature rise: 2.0°C predicted
- 1.0° - 4.0°C at extreme ranges

Increased annual precipitation

- Lower frequency of rainy days; increased intensity

Cyclonic disturbances

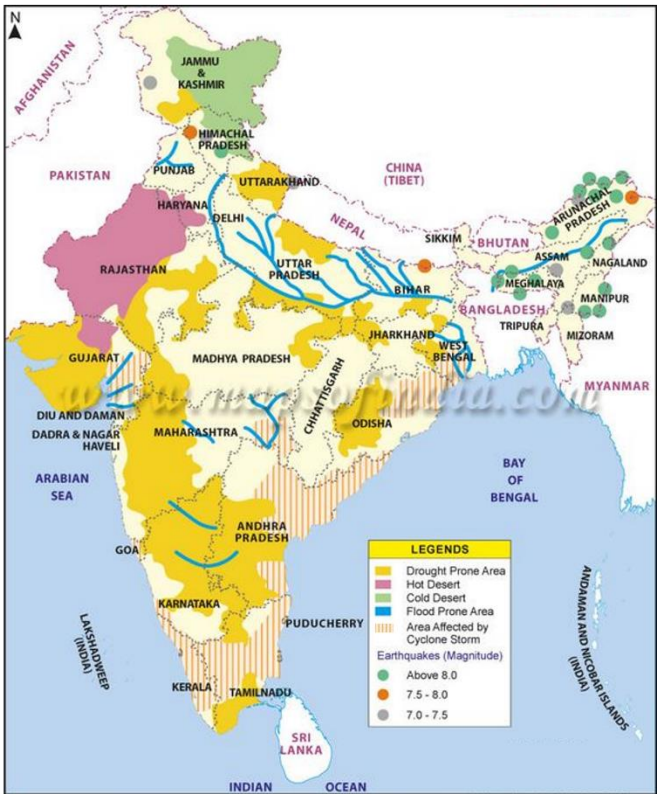

- Lower frequency; increased intensity
- Increased risk of storm surges

Sea-level rise

- 1.3mm/year on average

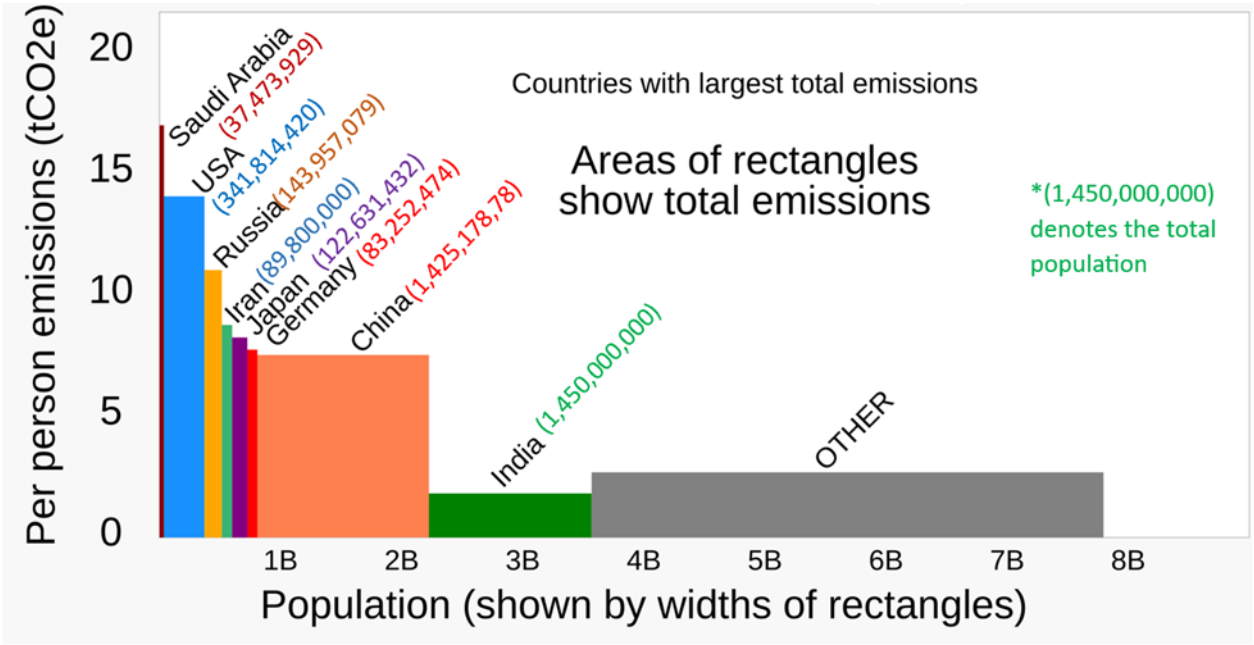

Fresh water supply

- High variability predicted in water yields (from 50% increase to 40-50% reduction)
- 10 – 30% increased risk of floods; increased risk of droughts

Resource 10 for Question 3

Carbon dioxide emissions per person

Resource 11 for Question 3

U.S.-India partnership leads on climate crisis
reported by Leigh Hartman on May 9, 2024

The U.S.-India partnership on climate change leads by example and offers a blueprint for how countries can address climate change.

By combining their resources, expertise, and leadership, the world's oldest and world's largest democracies are not only advancing their own clean energy goals but also set a powerful example.

"We have an extraordinary partnership between the United States and India that has grown stronger and stronger in recent years, stronger than it's ever been," Secretary of State Antony Blinken said when he met with Indian External Affairs Minister Subrahmanyam Jaishankar in February. "It is for us among the most consequential relationships of any in the world."
