GEOGRAPHY **9173/01 (REVISED)**

Paper 1 **27 AUGUST 2024**

3 hours

Additional Materials: Answer Booklet
Insert

READ THESE INSTRUCTIONS FIRST

Write your name and class in the spaces at the top of this page.
Write in dark blue or black pen.
You may use an HB pencil for any diagrams or graphs.
Do not use staples, paper clips, highlighters, glue or correction fluid/tape.

The use of an approved scientific calculator is expected, where appropriate.

Answer **four** questions in total.

Section A
Both questions are compulsory.
Question 1
Question 2

Section B
Answer 1 question from each cluster
Question 3 or Question 4 (20m)
Question 5 or Question 6 (20m)

The Insert contains all the Resources referred to in the questions.
You should make reference to appropriate examples studied in the field or the classroom, even where such examples are not specifically requested by the question.
Diagrams and sketch maps should be drawn whenever they serve to illustrate an answer.
The world outline map may be annotated and handed in with relevant answers.

Section A

Structured Questions

Answer both questions in this Section

Cluster 1 : Development, Economy and Environment

1 Resource 1 shows e-waste collection rate in the world. Resource 2 shows the reliance on the use of fossil fuels. Resource 3 shows the growth of renewable energy between 2013 and 2022. Resource 4 shows the variations in the growth of specific renewable energy in 2022.

*E-waste refers to electrical and electronic equipment that has been discarded. It includes items like desktop, laptop and tablet computers, mobile phones, TVs, refrigerators, air conditioners, washing machines, batteries, electronic toys, sports and leisure equipment.

(a) Cite data from Resource 1 to describe the global e-waste collection rate. [3]

(b) With reference to Resource 1, suggest ways to curb e-waste in different parts of the world. [5]

(c) Despite efforts to reduce carbon emissions, there is still reliance on the use of fossil fuels. Suggest reasons for this trend using Resource 2. [5]

(d) With reference to Resource 3, account for the spatial and temporal variation of the usage of renewable energy. [6]

(e) Explain the trade-offs associated with the use of renewable energy shown in Resource 4. [5]

(f) With reference to all Resources, explain if sustainable development efforts by countries have been successful. [6]

Cluster 2 : Tropical Environments

2 Resource 5 shows the climate graph of Dhaka, Bangladesh. Resource 6 is a photograph of a part of the Brahmaputra River in the middle course of the river. Resource 7A and 7B show photographs of Dhaka during a flood. Resource 8 shows the map of the Ganges Brahmaputra Delta in Bangladesh.

(a) Cite data from Resource 5 to describe the temperature and rainfall characteristics of Dhaka, Bangladesh. [4]

(b) Sketch and annotate the features of the Brahmaputra River shown in Resource 6. [4]

(c) Account for the formation of the Brahmaputra River using Resources 5 and 6. [6]

(d) With reference to Resources 7A and 7B, explain the challenges of implementing appropriate flood management strategies in Dhaka, Bangladesh. [6]

(e) Describe the characteristics of the Ganges Brahmaputra Delta shown in Resource 8. [4]

(f) Using Resource 8, explain the impact of human activities on the ecosystem services provided by the Ganges Brahmaputra Delta. [6]

Section B

Answer **Either** Question 3 **or** Question 4 and
Either Question 5 **or** Question 6.

Cluster 1 : Development, Economy and Environment

3 ‘Extractive industries have shaped economies, societies, and politics of nations—for good and bad.’

Evaluate the success of managing extractive industries in low income countries. [20]

4 ‘Population is a strong driver of the economy as well as the quality of the labour force.’

Evaluate the influence of labour on economic activities. [20]

Cluster 2 : Tropical Environments

5 ‘Monsoons play a principal role in characterising the climate of the tropics.’

Evaluate this statement with reference to the climate in the tropics. [20]

6 ‘Physical weathering predominates in higher latitudes, while chemical weathering is more common in lower latitudes.’

Evaluate this statement. [20]

[Total : 100 marks]
