Name: _____ **Class:** _____

JURONG PIONEER JUNIOR COLLEGE

JC2 Preliminary Examination 2025

GEOGRAPHY **8834/01**

Higher 1 **3 September 2025**

Paper 1 **3 hours**

Additional materials: Insert

READ THESE INSTRUCTIONS FIRST

An answer booklet will be provided with this question paper. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper ask the invigilator for a continuation booklet.

Answer Question 1 in **Section A**.
Answer both questions in **Section B**.
Answer **two** questions in **Section C**.

The number of marks is given in brackets [ ] at the end of each question or part question.

This document consists of **4** printed pages and **1** insert.

Section A

Cluster 2 Fieldwork

1 A group of 10 Geography students from a secondary school in Hong Kong conducted fieldwork to investigate the accessibility needs of elderly residents living in the city's public housing estates. Their focus was on how easily these residents could move around and access essential facilities within their immediate housing environment. The students carried out their investigation over two weekday evenings. They chose to focus on Tung Tau Estate, one public housing estate in the city, and formulated the following research question:

'How easy is it for elderly residents in Tung Tau to move around and access essential facilities within their estate?'

The students used a questionnaire and collected data from 40 elderly residents at a bus interchange within the public housing estate.

Resource 1A shows a map of Tung Tau public housing estate and the bus interchange where the data collection took place. Resource 1B shows a street-level photograph of the bus interchange. Resource 2 shows the questionnaire used by the students. Resource 3 shows results of survey item #3 on the questionnaire.

(a) Explain one strength and one limitation of the students' research question. [4]

(b) With reference to Resources 1A and 1B, explain the advantages of administering the questionnaire at the bus interchange. [4]

(c) Describe the sampling method the students used when collecting data from elderly residents. [3]

(d) Explain how the questionnaire as shown in Resource 2 may be improved. [6]

(e) Suggest how the data representation method as shown in Resource 3 may be appropriate for the data collected. [3]

(f) Evaluate the students' investigation on the accessibility needs of elderly residents living in public housing estates in Hong Kong. [10]

Section B

Cluster 1 Sustainable Future and Climate Change

Answer **both** questions.

2 Resource 4 shows waste generation at both global and projected levels. Resource 5 shows ecological footprints of Singapore and Sweden from 1973 to 2024. Resource 6 shows the trend of Singapore's overall and domestic (household) recycling rate from 2014 to 2024.

(a) With reference to Resource 4, describe the spatial pattern of waste generation in 2016. [3]

(b) Suggest possible reasons for the unequal increase in forecasted waste generation levels across different regions by 2050, as shown in Resource 4. [4]

(c) With reference to Resource 5, compare the ecological footprints between Singapore and Sweden. [4]

(d) Suggest why some cities in developed countries may have low ecological footprints. [7]

(e) Explain how the trend of Singapore's recycling rate as shown in Resource 6 may impact sustainable urban development. [4]

3 Resource 7 shows the sea ice age percentage within the Arctic Ocean for the week of 11–18 March from 1985 to 2022. Resource 8 shows the minimum extent of Arctic Sea ice from 1979 to 2024. Resource 9 shows current and northern sea routes. Resource 10 shows the projected changes in agricultural productivity due to climate change by 2080.

(a) With reference to Resource 7, compare the sea ice age percentage within the Arctic Ocean in 1985 and 2022. [4]

(b) With reference to Resource 8, describe the trend in the minimum extent of Arctic Sea ice from 1979 to 2024. [4]

(c) Outline how changes in ice sheets can affect temperatures through feedback mechanisms. [4]

(d) Explain why in-situ data on vast polar regions remains incomplete, and how this limits certainty in understanding future climate change impacts. [4]

(e) Citing data from Resources 9 and 10, explain how contemporary climate change may affect different places in different ways. [6]

Section C

Cluster 1 Sustainable Future and Climate Change

Answer **two** questions.

4 Evaluate the reasons for slum development in urban areas. [13]

5 'Changes in solar output is the most significant factor influencing temperature variability in the Quaternary Period'.

Evaluate this statement. [13]

6 Evaluate the challenges in implementing strategies to respond to contemporary climate change. [13]
