GEOGRAPHY **9173/01**
Paper 1

29 August 2025

3 hours

Additional Materials: Insert

READ THESE INSTRUCTIONS FIRST
An answer booklet will be provided with this question paper. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper, ask the invigilator for a continuation booklet.

Write your Centre number, index number and name on the work you hand in.
Write in dark blue or black ink on both sides of the paper.
You may use an HB pencil for any diagrams or graphs.
Do not use staples, paper clips, glue or correction fluid.

Section A
Answer **both** questions.

Section B
Answer **two** questions, **one** from each cluster.

The number of marks is given in brackets [ ] at the end of each question or part question.

Section A

Answer **both** questions.

Cluster 1: Development, Economy and Environment

1 Resource 1 shows the global energy consumption by source. Resource 2 shows the hydropower projects in the world in 2020. Resource 3 shows a hydropower dam in China. Resource 4 shows China's installed generation capacity of different energy sources and its energy progress report towards achieving Sustainable Development Goal (SDG) 7: Affordable and Clean Energy.

(a) Using an example for each, explain what is meant by renewable and non-renewable resources. [4]

(b) Cite data from Resource 1 to compare the actual and projected global energy consumption in 2010 and 2050. [4]

(c) Suggest reasons for the trends described in **(b)**. [6]

(d) Describe the spatial distribution of the hydropower projects in the world shown in Resource 2. [5]

(e) With reference to Resource 3, explain the social, economic and environmental trade-offs of using hydropower to achieve energy security. [6]

(f) With reference to Resource 4, describe the challenges associated with China's attainment of SDG 7 by 2030. [5]

Cluster 2: Tropical Environments

2 Resource 5 shows a schematic map of the Ganga River flowing through the alluvial Ganga Plain and Bengal Plain. Resource 6 shows sediment grain size variation by downstream distance in the Ganga River. Resource 7 shows the changes in fluvial landform morphology of the Ganga River near Munger, Bihar in 1900, 1936 and 1963. Resource 8 shows land cover changes in the Ganga-Brahmaputra-Meghna Delta from 2020 to projected year 2080.

(a) With reference to Resources 5 and 6, account for the relationship between sediment size and downstream distance in the Ganga River. [4]

(b) Using Resource 7, describe how the fluvial landforms of the Ganga River have changed between 1900 and 1963. [5]

(c) With reference to Resources 5, 6 and 7, suggest factors that could influence changes in fluvial landforms of the Ganga River over time. [6]

(d) Using Resource 8, explain how projected changes in the Ganges-Brahmaputra delta from 2020 to 2080 could cause fluvial floods. [5]

(e) With reference to Resource 8, explain how human activities in the Ganga River basin could have an impact on ecosystem services. [6]

(f) Suggest the strengths and limitations of **two** strategies to manage fluvial floods. [4]

Section B

Answer **two** questions from this section.

Answer **either** question 3 **or** question 4 and answer **either** question 5 **or** question 6.

Cluster 1 Development, Economy and Environment

3 Evaluate the usefulness of Malthus' theory in understanding current global challenges related to population growth and provisioning services. [20]

4 Evaluate the influence of multilateral institutions on economic activities. [20]

Cluster 2 Tropical Environments

5 'The Hadley cells are the main influence on rainfall patterns in the tropics.'

Evaluate this statement. [20]

6 'Geology is the most important factor influencing the formation of karst landforms in the humid tropics.'

Evaluate this statement. [20]
