Paper 2 **26 September 2025**

3 hours

Additional Materials: 1 Insert

READ THESE INSTRUCTIONS FIRST

An answer booklet will be provided with this question paper. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper ask the invigilator for a continuation booklet.

The Insert contains all the Resources referred to in the questions.
You should make reference to appropriate examples studied in the field or the classroom, even where such examples are not specifically requested by the question.
Diagrams and sketch maps should be drawn whenever they serve to illustrate an answer.
You are reminded of the need for good English and clear presentation in your answers.

The number of marks is given in brackets [ ] at the end of each question or part question.

Section A

Answer the question found in this section.

Cluster 4: Fieldwork

1 A team of 10 students was tasked to study flood risk variation along the 3.2-kilometre stretch of the Kallang River flowing through Bishan-Ang Mo Kio Park as shown in Resource 1. The students theorised that the flood risk of a river is associated with its channel characteristics and decided to collect fieldwork data at multiple locations along the Kallang River, as depicted in Resource 2. The students had access to the following equipment and completed their fieldwork measurements on a Saturday morning:

- Ranging Poles
- Metre ruler
- Tape Measure
- Spirit Level
- Thick Rope

In addition, the students decided to observe the intensity of human activities at the park. They carried out the observation study on a Tuesday morning from 8am to 9am at location 7 shown in Resource 1. Resource 3 shows the data they have collected from the observation study.

(a) Describe how the students could have carried out their fieldwork to collect data that was used to produce figures presented in Resource 2. [6]

(b) With reference to Resource 1, explain the safety precautions the students had to take as they did their fieldwork to gather data for the figures in Resource 2. [5]

(c) With reference to Resource 2, suggest how the students could minimise the impact of their fieldwork at Kallang River. [5]

(d) One student commented that flood risk is greatest at Point E along the Kallang River. Do you agree? Provide an explanation. [4]

(e) With reference to Resource 3, explain **two** ways to improve the data collection for the observation study on the intensity of human activities at the park. [4]

(f) Additionally, the students planned to conduct a survey with the residents to gather perceptual data on flood risk at Bishan-Ang Mo Kio Park. Design a questionnaire which they could use to conduct the survey. [6]

(g) Evaluate the usefulness of the students' fieldwork study on flood risk at Bishan-Ang Mo Kio Park. [10]

Section B

Cluster 3: Sustainable Future and Climate Change

2 Resource 5 shows the trends in the urban area and population of Dhaka, Bangladesh during the period projected from 1989 to 2030. Resource 6 shows the distribution of multiple deprivation in Rangpur City, Bangladesh. Resource 7 shows the contribution of indicators to overall poverty in Bangladeshi cities among children aged 6 to 17 years. Resource 8 shows an excerpt from a BBC article dated 1 July 2015.

(a) Citing data from Resource 5, compare the trends in the urban area and population of Dhaka, Bangladesh during the period 1989 to 2030. [4]

(b) Cite data from Resource 6 to describe the distribution of multiple deprivation in Rangpur City, Bangladesh. [5]

(c) Citing data from Resource 7, compare the contribution of indicators to overall poverty in Chittagong and Rangpur. [4]

(d) With reference to Resource 7, explain how the main indicators contributing to overall poverty in Rangpur can impede Rangpur from attaining sustainable urban development. [6]

(e) Using Resource 8, explain how the strategies implemented improve the lives of slum dwellers. [7]

(f) Explain why the development of slums may motivate cities to engage in urban reimaging. [4]

Section C

Answer **either** question 3 **or** question 4.

Cluster 3: Sustainable Future and Climate Change

3 Evaluate the success of strategies aimed to address the issues faced by women living in the city. [20]

4 Evaluate the variations in impacts of contemporary climate change on places. [20]
