Paper 1

8834/01

31 August 2026

3 Hours

Additional Materials: Insert

READ THESE INSTRUCTIONS FIRST

An answer booklet will be provided with this question paper. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper ask the invigilator for a continuation booklet.

Answer Question 1 in **Section A.**
Answer both questions in **Section B**.
Answer **two** questions in **Section C**.

The number of marks is given in brackets [ ] at the end of each question or part question.

Section A

Cluster 2: Fieldwork

1 A group of five neighbourhood enthusiasts from Tiong Bahru wanted to find out if the recently implemented smart recycling machine called REhub is well-received by residents, after getting inspired by an article they read from Channel News Asia. They came up with the following hypothesis:

"*The introduction of REhub in Tiong Bahru has encouraged its residents to recycle.*"

The group printed out questionnaire surveys and placed them under the doors of all the residential units in the housing estate. Once residents completed the surveys, they could drop them off at a collection box placed next to REhub in Tiong Bahru Community Centre.

Resource 1 is a map of the housing estate in Tiong Bahru, with an outline of the investigation site. Resource 2 shows an extract of the article from Channel News Asia. Resource 3 shows the questionnaire survey used. Resource 4 shows the data collected for Question 8.

(a) Explain how the hypothesis is appropriate. [4]

(b) Explain the pros and cons of the sampling method used in conducting the questionnaire surveys. [6]

(c) Explain how the questionnaire survey in Resource 3 can be improved. [6]

(d) Sketch a suitable graph to represent the data for Question 8 as shown in Resource 4. [4]

(e) Evaluate the validity of the enthusiasts' fieldwork. [10]

Section B

Cluster 1: Sustainable Future and Climate Change

Answer **both** questions.

2 Resource 5 shows the regional waste generation (2016 to 2050). Resource 6 shows the Ecological Footprint by country (2018). Resource 7 shows an infographic on the Beverage Container Return Scheme in in Singapore.

(a) With reference to Resource 5, compare the forecasted regional waste generation between Sub-Saharan Africa and Europe & Central Asia. [4]

(b) Using Resource 6, describe the global pattern of ecological footprint shown. [6]

(c) Explain the challenges that cities face in reducing their non-hazardous solid waste to achieve urban sustainability. [4]

(d) Suggest why some cities in high income countries may have low ecological footprints. [4]

(e) With reference to Resource 7, explain how the strategy shown can contribute to urban sustainability. [4]

3 Resource 8 shows the CO_2 concentrations and Antarctic temperatures for the past 800,000 years. Resource 9 shows the global levels of climate vulnerability. Resource 10 is a cartoon depicting challenges in implementing strategies in response to climate change.

(a) Using Resource 8, describe the relationship between CO_2 concentrations and Antarctic temperatures over the past 800 000 years. [4]

(b) Explain how ice cores provide evidence of past climate variability. [3]

(c) Explain how the increased concentration of greenhouse gases can contribute to contemporary climate change. [4]

(d) Using Resource 9, suggest why climate vulnerability differs between the regions shown. [5]

(e) With reference to Resource 10, explain the challenges in implementing strategies in response to climate change. [6]

Section C

Answer **two** questions.

4 ‘Urban reimaging is key to achieving sustainable urban development.”
Evaluate this statement. [13]

5 Evaluate the issues that affect the liveability of women living in cities. [13]

6 Evaluate the influence of firms in climate change response. [13]
