Resource 1 for Question 1

Map showing the location of the Vauban district in Freiburg, Germany (★)

Resource 2 for Question 1
Photographs taken during the students' on-site field inspection of Vauban district in Freiburg, Germany

" The Sun Ship" has many energy plus buildings
(Buildings that generate more renewable energy than the building's occupants consume)

Students of Crystalis Junior College appreciating the cutting edge energy efficient green building.

The majority of residents in Vauban do not own a car, choosing instead to use the tram, cycle or simply walk. In Vaubun roads designated for cars are very narrow. Most streets do not have parking spaces.

Freiburg's extensive tram and bus network ensures that most homes are within 400 metres of a public transport stop, while high levels of car-sharing further encourage residents to adopt low-carbon modes of transport.

Resource 3 for Question 1

Data recording sheet for the survey

Respondent number	:_____
Survey Location	☐ Outside convenience stall ☐ In the neighbourhood park ☐ On the street
Date/Time	_____
Approximate Age	☐ <18 ☐18–29 ☐30–49 ☐50–64 ☐65+
Gender (Optional)	☐ Male ☐ Female ☐ Prefer not to say
Resident of Vauban?	☐ Yes ☐ No
Relationship status	☐ Single ☐ Married ☐ Divorced/Separated ☐ Widowed
Household income	☐ Below € 10,000 ☐ €10,000-14999 ☐ €15000 and above
Total number of occupants in the household	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10 or more

Please indicate your level of agreement for the following statement.
1 for 'strongly agree' and 5 for 'strongly disagree'

Statement	Strongly Agree 1	Agree 2	Neutral 3	Disagree 4	Strongly disagree 5
1. I support the use of renewable energy in Freiburg.	☐	☐	☐	☐	☐
2. Renewable energy improves the quality of the urban environment.	☐	☐	☐	☐	☐
3. I am willing to pay more for electricity generated from renewable sources.	☐	☐	☐	☐	☐
4. I encourage others to adopt renewable energy technologies.	☐	☐	☐	☐	☐
5. Government incentives make me more willing to adopt renewable energy.	☐	☐	☐	☐	☐
6. I support Freiburg's sustainable transport policies.	☐	☐	☐	☐	☐
7. Public transport is convenient for my daily travel.	☐	☐	☐	☐	☐
8. Cycling and walking are safe and attractive in Vauban.	☐	☐	☐	☐	☐
9. I prefer using public transport or cycling instead of driving.	☐	☐	☐	☐	☐
10. Restricting private car use improves residents' quality of life.	☐	☐	☐	☐	☐

Thank you / *Danke*

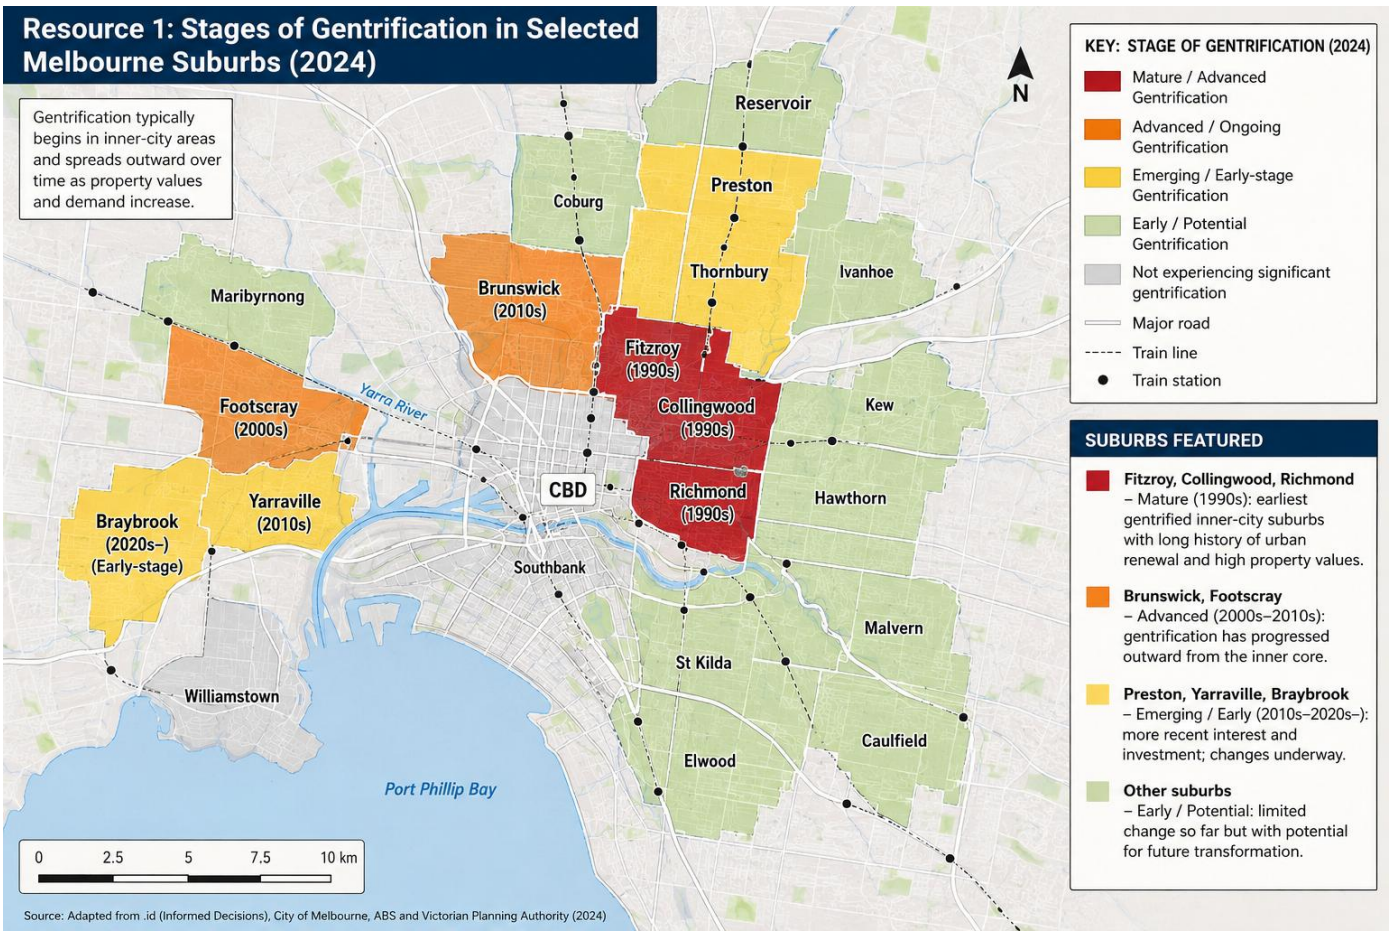

Resource 4 for Question 1

The residents' responses to selected survey questions

Survey Question	1 Strongly Agree	2 Agree	3 Neutral	4 Disagree	5 Strongly Disagree
Q1. I support the use of renewable energy in Freiburg.	15	18	4	2	1
Q3. I am willing to pay more for electricity generated from renewable sources.	10	17	6	5	2
Q9. I prefer using public transport, cycling or walking instead of driving.	15	16	5	3	1

Resource 5 for Question 2

Stages of reimaging in selected Melbourne suburbs

Resource 6 for Question 2
Indicators of reimaging in selected suburbs in Melbourne

Indicator	Fitzroy		Footscray		Braybrook	
	2000	**2024**	**2000**	**2024**	**2000**	**2024**
Median weekly household income (A$)	1,180	2,650	890	1,850	760	1,500
Residents with bachelor's degree or higher (%)	28	58	16	34	10	20
Median weekly rent (A$)	230	760	180	560	150	470
Median house price (A$ million)	0.45	1.85	0.28	1.10	0.22	0.88
Residents employed in professional occupations (%)	24	46	15	28	11	18
Number of cafés/restaurants	38	126	18	63	8	29
Vacant/industrial land (%)	18	6	22	10	26	16

Resource 7 for Question 2

Resource 8 for Question 2
An Australian newspaper report on gentrification in Melbourne

Over the past two decades, Melbourne's inner-western suburbs, including Footscray and Braybrook, have experienced significant urban transformation. Former warehouses and vacant industrial sites have been redeveloped into apartments, cafés, community parks and mixed-use developments. Local councils have also invested in cycling paths, streetscape improvements and better public transport to encourage more sustainable urban living.

Many newer residents welcome these changes. "I can walk to cafés, shops and the train station in less than ten minutes," said software engineer Emily Elroy, who moved to Footscray in 2022. "The neighbourhood feels much safer now, and there are plenty of green spaces for families."

Local business owners have also benefited. Café owner Daniel Nguyen explained that the growing number of young professionals has increased customer demand. "Five years ago, this street was quiet after office hours. Today, restaurants and cafés are busy throughout the week."

However, not all residents view these changes positively. Maria Lopez, who has lived in Footscray for more than 35 years, said rising rents and property prices have forced many long-term neighbours to move away. "The community has changed so quickly. Many families who helped build this neighbourhood simply can't afford to stay."

Community organisations have also expressed concern that some redevelopment projects have reduced the supply of affordable housing. Although urban renewal has improved the physical environment, lower-income households increasingly struggle to remain in the area as housing costs continue to rise.

Urban planners argue that redeveloping underused industrial land helps limit urban sprawl and supports more sustainable forms of development. Nevertheless, they emphasise that future redevelopment projects should balance economic growth with social inclusion by providing more affordable housing and preserving local community identity.
