Resource 3 for Question 1

Questionnaire used by students for the survey

Research question : *How inclusive is urban reimaging in meeting the needs of elderly residents in Manchester's* Sackville Street *and Canal Street?*

Date: _____

Location: □ Sackville Street □ Canal Street

Respondent No.: _____

Respondent Profile :

Statement	Strongly Disagree (1)	Disagree (2)	Neutral (3)	Agree (4)	Strongly Agree (5)
1. I feel safe walking in this area during the daytime.	□	□	□	□	□
2. I feel safe walking here in the evening.	□	□	□	□	□
3. There are sufficient pedestrian crossings for elderly people.	□	□	□	□	□
4. Public transport is easy to access from this area.	□	□	□	□	□
5. Public transport services meet my daily needs.	□	□	□	□	□
6. The pavements are easy and comfortable to walk on.	□	□	□	□	□
7. There are enough benches for resting.	□	□	□	□	□
8. The area is accessible for people with mobility difficulties.	□	□	□	□	□
9. I feel welcomed and included in this neighbourhood.	□	□	□	□	□
10. There are enough places where elderly people can meet and socialise.	□	□	□	□	□
11. The public spaces encourage interaction between different age groups.	□	□	□	□	□
12. Overall, urban reimaging has improved my quality of life.	□	□	□	□	□

Resource 4 for Question 1
Data collected from the questionnaire survey

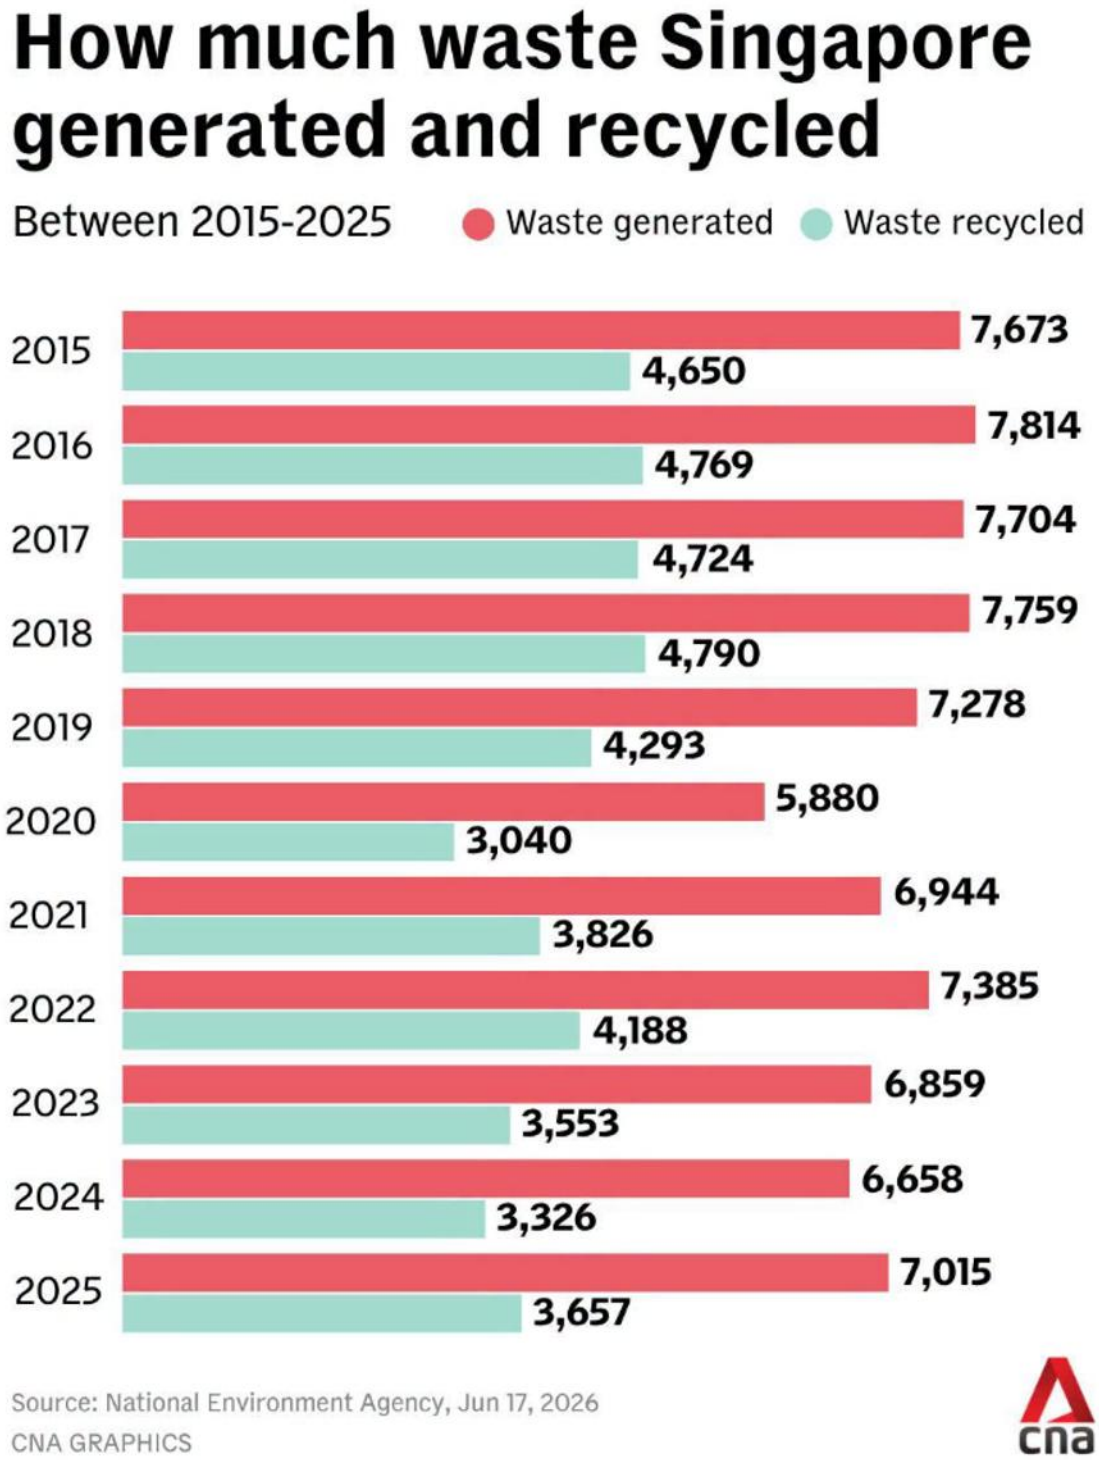

Q4. Public transport is easy to access from this area.						
Respondent Group	**Strongly Agree (1)**	**Agree (2)**	**Neutral (3)**	**Disagree (4)**	**Strongly Disagree (5)**	**Total**
Residents (60–69) (n=21)	10	8	2	1	0	**21**
Residents (70–79) (n=13)	4	6	2	1	0	**13**
Residents (80+) (n=5)	1	2	1	1	0	**5**
Foreigners (n=11)	3	4	1	1	2	**11**
Total	**18**	**20**	**6**	**4**	**2**	**50**

Q6. There are enough places where elderly people can meet and socialise.						
Respondent Group	**Strongly Agree (1)**	**Agree (2)**	**Neutral (3)**	**Disagree (4)**	**Strongly Disagree (5)**	**Total**
Residents (60–69) (n=21)	6	8	4	2	1	**21**
Residents (70–79) (n=13)	2	5	3	2	1	**13**
Residents (80+) (n=5)	0	1	2	1	1	**5**
Foreigners (n=11)	2	2	3	3	1	**11**
Total	**10**	**16**	**12**	**8**	**4**	**50**

Resource 5 for Question 2

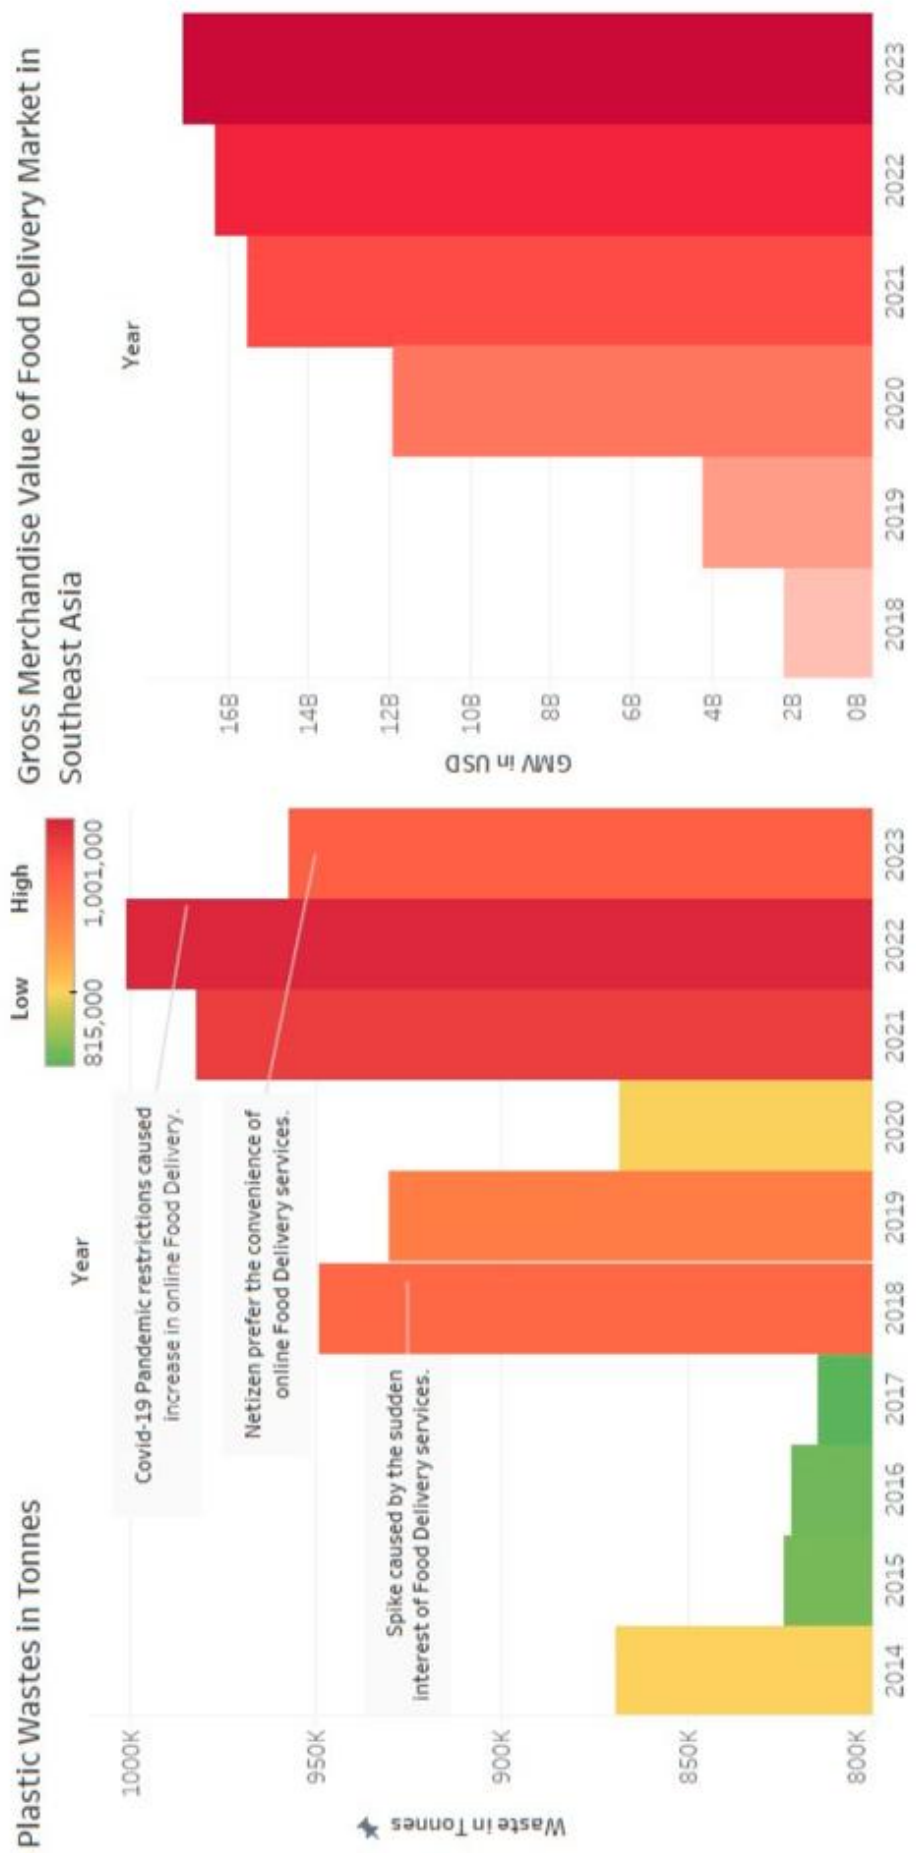

Singapore's waste recycled (2015 – 2025)

©YIJC

Resource 6 for Question 2

Graph shows Singapore's changing plastic waste

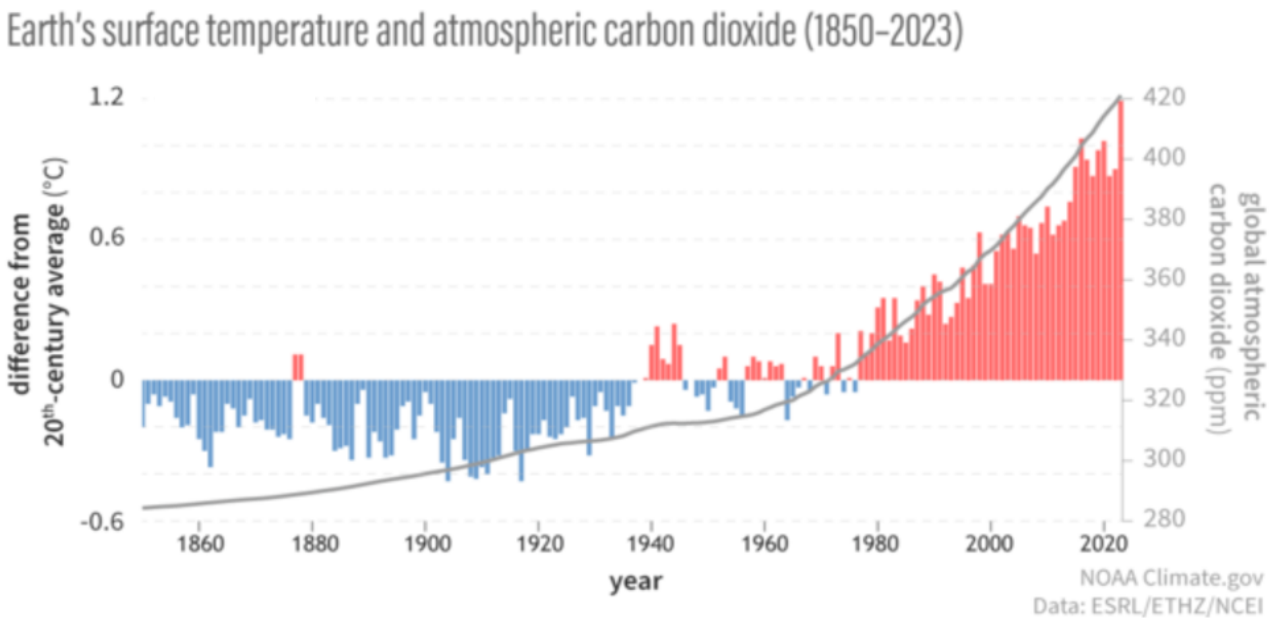

Resource 7 for Question 2

Photograph shows garbage and sewage waste pile up on Mumbai's Juhu Beach

Resource 8 for Question 2

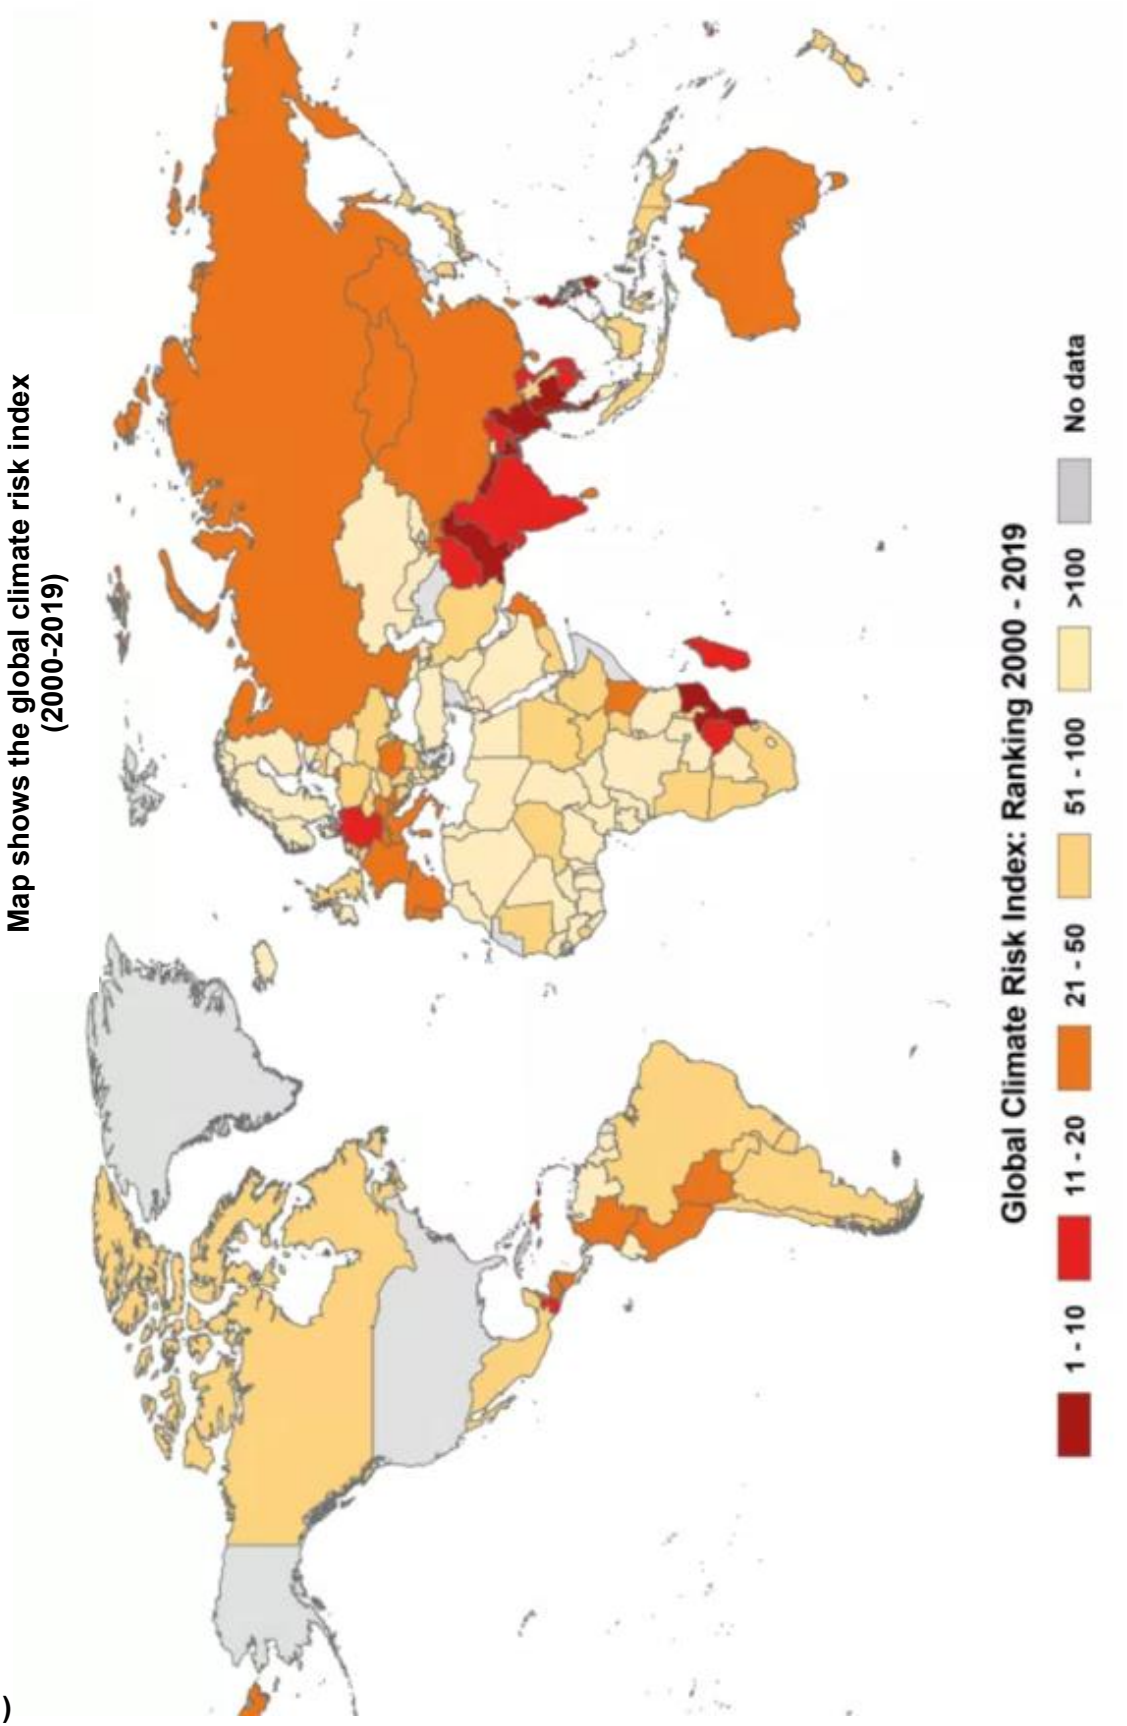

Graph showing the changing Earth's surface temperature (1850 -2025)

©YIJC

Resource 9 for Question 3

Map shows the global climate risk index (2000-2019)

)

©YIJC

Resource 10 for Question 3

Primary Climate Hazard

INFRASTRUCTURE & HEAT RETENTION

Urban centers are significantly warmer than surrounding rural areas due to infrastructure.

Urban center warming

Buildings, roads, and cement surfaces retain and produce heat, whilk a lack of green space prevents natural cooling.

The "Sponge City" Solution

Berlin's "StEP Klima KONKRET" plan
Berlin is replacing hard surfaces with trees and urban wetlands to keep the city several degrees cooler.

Massive Economic Productivity Less: Heat extremes could cost the global economy **$2 trillion** by 2030.

UNPREDICTABLE WEATHER & VARIABILITY

Cities face a shift toward "Wet and Dry" extremes, with more frequent and severe instances.

Singapore's Rising Mean Temperature:
Annual mean temperatures are rising by **0.24°C per decade**, potting local bindiversity at risk.

WATER AND FOOD SECURITY CHALLENGES

Drought-Driven Resource Scarcity

Prolonged dry spolls threaten the reliability of municipal water supplies.

Global Food Supply Chains

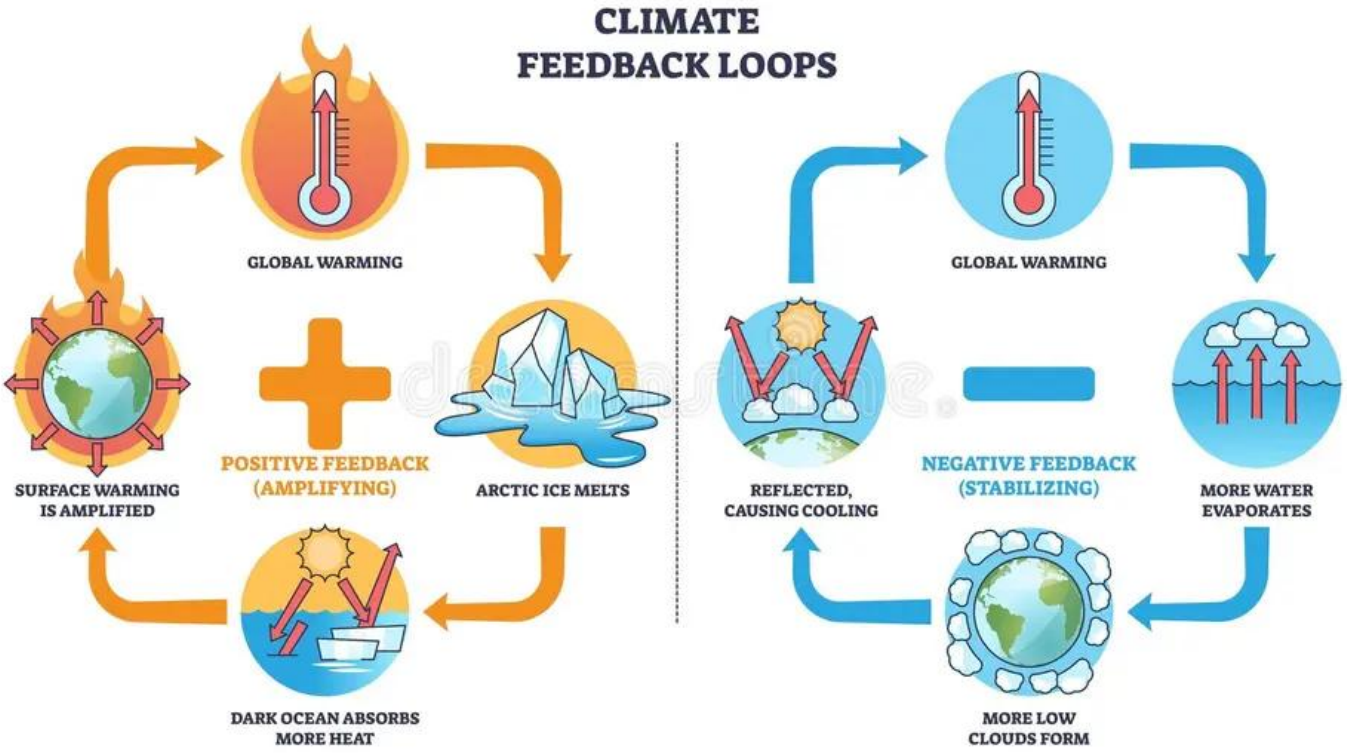

Climate-driven crop disruptions abroad directly impact urban food security.

Cities like Singapore, which imports over 90% of its food, are highly vulnerable to price fluetuations caused by storms and droughts.
